Blood of Olympus - Ch. 35470590 Perfect Blood

I am a 70-year-old with O-negative blood type. When I was 40, the Red Cross notified me that antibodies of hepatitis C had been detected in my blood and they would no longer accept blood donations ...

Dr. Roach: Any history of hepatitis C makes blood donation a no-go

A total lunar eclipse will grace the night skies this weekend, providing longer than usual thrills for stargazers across North and South America. The celestial action unfolds Sunday night into early ...

Moon goes blood red: How to watch the lunar eclipse this weekend

Community Blood Center of the Ozarks (CBCO), the exclusive ... If you have never donated before, now is the ideal time to start. | During May, all donors will receive a limited-edition T-shirt ...

The premier clinical hepatology reference for 50 years, Schiff's Diseases of the Liver is in its Tenth Edition!now in full color throughout. This edition features a major new transplant section focusing on pre-transplant and post-transplant evaluation and management. Also included are updates on key topics such as hepatitis, NASH, and drug-induced pathologies. The first third of the book covers anatomy, pathology, testing, imaging, and effects of liver disease on other organs. Subsequent sections address specific diseases and clinical syndromes. Each of the 12 sections begins with an overview, and each chapter starts with an outline of key concepts. Numerous clinical algorithms appear throughout the text.

Treat the diseases affecting large animals! Veterinary Medicine, 11th Edition provides up-to-date information on the diseases of horses, cattle, sheep, goats, and pigs. Comprehensive coverage includes the principles of clinical examination and making a diagnosis, along with specific therapy recommendations. For easier use, this edition has been divided into two volumes and restructured into a logical, anatomically based approach to disease. From internationally known veterinary experts Peter Constable, Kenneth Hinchcliff, Stanley Done, and Walter Gibusberg, this book is the definitive, one-stop reference for farm animal and equine care. Comprehensive coverage includes information essential to any large-animal veterinarian, especially those working with horses, cattle, sheep, goats, or pigs. Coverage of diseases addresses major large-animal diseases of all countries, including foreign animal and emerging diseases. User-friendly format makes it easier to quickly absorb key information. Quick review/synopsis sections make important information on complex diseases easy to find. NEW! Convenient, easy-access format is organized by organ systems, and divides the content into two compact volumes with the same authoritative coverage. Nearly 200 new color photographs and line drawings are included in this edition. NEW full-color design improves navigation, clarifies subject headings, and includes more boxes, tables, and charts for faster reference. New Diseases Primarily Affecting the Reproductive System chapter is added. Updated and expanded chapter on pharmacotherapy lists therapeutic interventions and offers treatment boxes and principles of antibiotic use. Expanded sections on herd health include biosecurity and infection control, and valuable Strength of Evidence boxes. NEW or extensively revised sections include topics such as the Schmallenberg and Bluetongue viral epidemics of ruminants in Europe, Wesselbron disease in cattle, hypokalemia in adult cattle, equine multinodular pulmonary fibrosis, Hendra virus infection, porcine reproductive and respiratory syndrome, torque teno virus, and numerous recently identified congenital and inherited disorders of large animals. Additional content is provided on lameness in cattle and the diseases of cervids.

Written by the founder of the field of carbon [quantum] dots (carbon dots) and related technology, this book outlines the principles of carbon dots and presents strong evidence for that small carbon nanoparticles and by extension carbon dots represent the nanoscale carbon allotrope at zero-dimension. Historical accounts of the inception and evolution of the carbon dots field are provided. Experimental approaches and techniques for the dot synthesis and some related major issues are discussed in detail. The photoexcited state properties, especially the bright and colorful photoluminescence emissions, and photoinduced redox characteristics of carbon dots are presented, and so are their advantages over semiconductor quantum dots as well as fullerenes. Carbon dots are also compared with [graphene quantum dots], for which a unified mechanistic understanding is proposed. Finally, a broad range of applications of carbon dots and their derived hybrid nanostructures in biomedical, renewable energy, food and environmental safety, and other technologies are highlighted. The book concludes with a discussion on the excellent potential and opportunities for further research and development.

For centuries man has speculated about the medicinal properties of certain foods. Scientific investigation has shown us that hundreds of compounds exist in natural foods that have health promoting properties. The Handbook of Nutraceuticals and Functional Foods presents an up-to-date and comprehensive review of this rapidly growing field for nutriti

Building on the best-selling MEDICAL TERMINOLOGY FOR HEALTH PROFESSIONS series, this comprehensive text is designed to help students with no healthcare background achieve deep competence in medical terminology. In addition to 14 in-depth chapters on body systems and a unit on diagnostic procedures and nuclear medicine, the text includes chapters dedicated to key specialty areas, including mental health, infant and child health, gerontology, oncology and pharmacology. With a time-tested chapter and learning exercise structure that has made the series a leader for over 30 years, this reader-friendly new resource features streamlined content, contemporary illustrations and real-world examples to help make even complex material accessible to students with varied learning styles, as well as ESL learners. Each chapter begins with a vocabulary list of 60 key terms and 15 essential word parts. Terms are pronounced in MindTap as they appear. Application-based activities give students practice with critical skills such as term dissection and word-building in a real-world context, providing valuable exposure to a variety of medical reports. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This book is the first in a series compiling highly cited articles in nanomedicine recently. The series is edited by Lajos P. Balogh, a prominent nanotechnology researcher and journal editor. The first book content is about nanotechnology in cancer research. It also includes a wide variety of must-know topics that will appeal to any researcher involved in nanomedicine, macromolecular science, cancer therapy, and drug delivery research. These 31 articles collected here have already acquired more than 3500 citations (i.e., over a hundred on average), highlighting the importance and recognized professional interest of the scientists working in this field.
