~~Saab 99 and 900 is a detailed account of the cars that came from Saab, the aeroplane maker, whose first car - the 92 model - set the standard for advanced design epitomized by the 99 and 900 cars. The author delves deep into the cars' design and history, and into the core Saab values that they carried into production. Topics include: detailed design history of the 99 and 900; year-by-year developments; technically detailed engineering overviews; detailed specifications; advice on owning and buying and, finally, coverage of rallying and special models.~~

~~A definitive new history from internationally known Saab aficionado Lance Cole, Saab Cars - The Complete Story offers a detailed insight into the company's story, from the prototype UrSaab in 1946 to the end of production in 2012. It is a fitting tribute to the spirit and ethos of Saab design and engineering. Explains in detail the design and engineering history of Saab's pioneering work in aerodynamics, form, function and safety.Investigates the history and founding of Saab.Provides in-depth analysis of Saab's early cars and their engineering and design features.Profiles key figures in Saab's manufacturing and rallying success. Charts the days of the 'Save Saab' campagin and the battle to survive, and details the events that led to the company's demise.Includes recollections from Saab workers and those on the factory floor.Stunning visual coverage of the Saab models, with rare archive images and design sketches.~~

~~The full story and complete reference guide for the iconic Saab 900~~

~~The front-wheel-drive Saab 96 made the brand into a rally icon in the 1960s. It succeeded in events as diverse as the Monte Carlo, Britain's RAC rally, special stage events in every Scandinavian country, and the rough-and-tough Spa-Sofia-Liege Marathon. The big change came in 1967, when the 96 became the V4. Works cars continued to be competitive in carefully chosen events for many years, and when they became outdated, the V4's successors - the much larger and more powerful 99 and 99 Turbo types - proved that Saab wasn't done with rallying yet. More than any other car of its era, the 96 and V4 models proved that front-wheel-drive allied to true superstar driving could produce victory where no-one expected it.~~

~~This book explores the role that the language of international law plays in constructing understandings - or narratives - of hunger in the context of climate change. The story is told through a specific case study of genetically engineered seeds purportedly made to be 'climate-ready'. Two narratives of hunger run through the storyline: the prevailing neoliberal narrative that focuses on increasing food production and relying on technological innovations and private sector engagement, and the oppositional and aspirational food sovereignty narrative that focuses on improving access to and distribution of food and rejects technological innovations and private sector engagement as the best solutions. This book argues that the way in which voices in the neoliberal narrative use international law reinforces fundamental assumptions about hunger and climate change, and the way in which voices in the food sovereignty narrative use international law fails to question and challenge these assumptions.~~

~~Readers of Heather Morris's The Tattooist of Auschwitz and watchers of The Queen's Gambit won't want to miss this amazing debut set during World War II. A young Polish resistance worker, imprisoned in Auschwitz as a political prisoner, plays chess in exchange for her life, and in doing so fights to bring the man who destroyed her family to justice. Maria Florkowska is many things: daughter, avid chess player, and, as a member of the Polish underground resistance in Nazi-occupied Warsaw, a young woman brave beyond her years. Captured by the Gestapo, she is imprisoned in Auschwitz, but while her family is sent to their deaths, she is spared. Realizing her ability to play chess, the sadistic camp deputy, Karl Fritzsich, decides to use her as a chess opponent to entertain the camp guards. However, once he tires of exploiting her skills, he has every intention of killing her. Befriended by a Catholic priest, Maria attempts to overcome her grief, vows to avenge the murder of her family, and plays for her life. For four grueling years, her strategy is simple: Live. Fight. Survive. By cleverly provoking Fritzsich's volatile nature in front of his superiors, Maria intends to orchestrate his downfall. Only then will she have a chance to evade the fate awaiting her and see him punished for his wickedness. As she carries out her plan and the war nears its end, she challenges her former nemesis to one final game, certain to end in life or death, in failure or justice. If Maria can bear to face Fritzsich-and her past-one last time.~~

~~In the hilarious new novel in the best-selling Detective Varg series, an eminent art historian is framed and the ace investigators of the department of sensitive crimes are on the case. Detective Ulf Varg is a man of refined tastes and quite familiar with the art scene in Malmö. So when art historian Anders Kindgren visits the Department of Sensitive Crimes to report a series of bizarre acts that have been committed against him, Ulf and his team swing into action. Fish stuffed into the vents of Kindgren's car and a manipulated footnote in a recent publication would be cause enough for an investigation, but when a painting Kindgren had confidently appraised as genuine is later declared to be a fake, it's clear that someone is out to tarnish his reputation. Meanwhile, Ulf is also weathering personal issues, which quickly spiral out of control. When his lip-reading dog, Martin, engages in a contretemps with a squirrel that results in a grievous wound, Ulf must rush Martin to the veterinarian and weigh the merits of cosmetic surgery for animals. And later, when Martin's blood is found in the back of Ulf's classic Saab, Ulf finds himself the subject of a departmental investigation. In the end, Ulf will have to muster all his detective skills and bureaucratic cunning to restore Kindgren's reputation-as well as his own.~~

~~Looking behind the scenes at the personalities and policies of such venerable institutions as the Federal Arts Project and the Museum of Modern Art, A. Joan Saab discerns a broad-based democratic modernism inspired by and engaged with the social life of the period. In the summer of 1935 President Franklin Delano Roosevelt established the Federal Arts Project under the aegis of the Works Progress Administration. The project's goal was, in the words of its director Holger Cahill, to "get people all over the United States interested in art as an everyday part of living and working." In addition to this endeavor, the project would also provide work for artists who, as a project press release stated, "had been hit just as hard by unemployment as any other producing worker." Meanwhile, as director of the newly opened Museum of Modern Art, Alfred Barr was instituting his philosophy of "democracy in design" through a series of ambitious exhibits that focused on informed consumption in the marketplace. The idea of treating the artist as a "producing worker" and art as an "everyday part of living and working" was a novel one in 1935 and illustrated a broad shift in the social roles of both. Prior to the 1930s, art in America had resided principally in the domain of the cultural elite. The upheaval of the Depression era, however, challenged this authority. Throughout the decade, government officials, museum professionals, educators, and artists worked together to determine not only what role artists would play in society but also what forms democratic art would take and how widely it would be disseminated, thus fundamentally redefining the relationship between art and society. This egalitarian artistic movement of the 1930s stands as a significant moment in the ongoing dialogue over the relationship of art and public life that continues today.~~
