Cruise ships, the largest moving man-made objects, can be almost a quarter-mile long, as tall as a 25-story building, and can be largely self-contained cities of perhaps 8,000 people. With 172 photographs and illustrations, the cruise ship is examined; its planning, construction, operation, and ultimate fate. This behind-the-scenes look examines the concept, development, and construction of vessels, what makes them work, and how, as well as ship operations. More than 240 ships are highlighted as the cruise ship's history is traced from its origins through to its future projections. This book is a great resource for designers, architects, shipbuilders, and the cruise ship passenger. Read it before you board and take it along when you sail."

The stunning elegance and luxurious interiors of today's vast fleet of cruise liners remains unrecorded in all but holiday brochures. This book gives a complete overview of the cream of these ships, today's queens of the sea. Each liner is illustrated and described with color illustrations of external and interior views. Details of the design, building and service history of each vessel are provided with vital statistics of the ship and its facilities. Among the ships included are Cunard's Queen Victoria and Queen Mary 2, the big new Princess Line liners—Ruby, Grand Sea and Celebrity Eclipse, the two Ocean Village ships and the largest of the P&O liners Ventura, Oceana, Arcadia, Aurora and Artemis. This is a book of reference for maritime enthusiasts, would-be holiday cruisers and those who have been passengers.

The cruise ship market is a 30 billion-dollar industry, and in 2013 it is estimated that it will carry more than 20 million passengers; nor is there any sign of a slow down in the seven percent annual growth. What keeps the passengers coming in such huge numbers isn't the food, the ports or the entertainment. They come for the magnificent floating palaces themselves, the giants of the sea. In this new book, the author showcases the most influential cruise ships of the last three decades beginning with Royal Caribbean's ground-breaking Sovereign of the Seas. When she was launched in 1988 she was the largest passenger ship constructed since Cunard's Queen Mary entered service some 48 years earlier, and her entry into service sparked a fiercely competitive building boom that continues to this day. The reader is taken aboard thirty of the most spectacular ships to reveal how their innovative designs changed the landscape of modern cruising. By employing original and archival photographs, deck plans, cruise programmes, as well as the author's intimate knowledge of many of these vessels, a unique picture is built up of these great ships and it becomes clear that the true Golden Age of Cruising is not in some distant past but exists right now, and that its origins can be traced back to one ship, launched in 1988. A truly sumptuous and fascinating book for all those drawn to the world of the modern cruise ship. As seen in Ships Monthly Magazine

A shocking exposé of modern piracy - the Fast Food Nation of the cruise industry

An anecdotal, highly personal course through America's nautical history features nearly 140 images of ships from the 18th through 20th centuries: quoddy boats, fishing schooners, clippers, packet ships, frigates, and other vessels.

Since the first commercial cruises began in the 1840s, ships have evolved into one of the world's most sophisticated, specialized, complex, and expensive type of vessel. The large modern purpose-built cruise ships of the 1930s, the German KdF ships Wilhelm Gustloff and Robert Ley emerged as prototypes for carrying a mass-market clientele. At the other end of the scale, the exquisite 1927-built Norwegian cruise yacht Stella Polaris represents a smaller, elite type of vessel offering the ultimate in luxury. In the postwar years, the two ends of the industry have expanded dramatically and the myriad of ships built are described in detail. Analyses of design influences, descriptions of interior layouts, exterior design, machinery requirements, and cruising grounds
