Part of the highly respected Requisites series, Radiology Noninterpretive Skills, by Drs. Hani H. AbuJudeh and Michael A. Bruno, is a single-volume source of timely information on all of the non-imaging aspects of radiology such as quality and safety, ethics and professionalism, and error management in radiology. Residents and radiologists preparing for the boards and recertification will find this book invaluable, as well as those practitioners wanting to broaden their knowledge and skills in this increasingly important area. Offers a readable and concise introduction to the essential noninterpretive skills as defined by the IOM, ACR, and other national organizations. Covers what you need to know about quality and safety; leadership and management; health economics; legal, business, ethics and professionalism; statistical tools; error reporting and prevention; evidence-based imaging; health IT and internet applications; "Image Wisely" and "Imaging 3.0" ACR initiatives; legal issues and malpractice; current and future payment models in radiology; and much more. Summarizes key information with numerous outlines, tables, "pearls," and boxed material for easy reference. Provides comprehensive coverage of key "milestones" in training identified by the Accreditation Council for Graduate Medical Education (ACGME). Fills an important gap for those preparing for the current MOC and ABR exams, covering the many topics touched upon in a major section of the examinations. Brings together in one source the experience of leading national experts and a select team of expert contributors.

Designed specifically for the Core Exam, **Neuroradiology: A Core Review** covers all key aspects of neuroradiology, mimicking the image-rich, multiple-choice format of the actual test. Ideal for residents preparing for the Core Examination, as well as practitioners taking recertification exams, this unique review follows the structure and content of what you'll encounter on the test, effectively preparing you for Core Exam success! Key Features Contains 300 questions with answers, explanations, and references. Covers the full spectrum of topics across brain, spine, and head and neck in a single volume Includes high-yield tables embedded in the answers for additional review. Provides answers and rationales as to why an answer is correct and other choices are incorrect. Your book purchase includes a complimentary download of the enhanced eBook for iOS, Android, PC & Mac. Take advantage of these practical features that will improve your eBook experience: The ability to download the eBook on multiple devices at one time -- providing a seamless reading experience online or offline Powerful search tools and smart navigation cross-links that allow you to search within this book, or across your entire library of VitalSource eBooks Multiple viewing options that enable you to scale images and text to any size without losing page clarity as well as responsive design The ability to highlight text and add notes with one click

This study guide will be a reliable support and easy-to-use source of information for students in the fields of dosimetry, physics, radiation oncology, and therapy as they progress through the educational levels in preparation for board examinations. The theoretical and practical knowledge gained by students on previous courses or in clinical settings is reinforced by means of almost 1200 questions and accompanying detailed analytical answers. In order to cater for the needs of all students, the questions are arranged according to three levels of difficulty. The level 1 questions are mainly intended for those hoping to pass the Medical Dosimetrist Certification Board (MDCB) exam but will also be beneficial for Medical Physics candidates taking written exams and for Radiation Oncology residents. The level II questions are in general clinically related and will be relevant for any student, while the level III questions are advanced and are especially suitable for American Board of Radiology candidates or those taking equivalent exams elsewhere in the world. The study guide is broken down into different subject areas, with provision of multiple questions and answers on each subject. In addition, the mathematical and physics questions include brief explanations of how the student can solve each problem. At the end of the guide, three practice tests are included with the same number of questions as are found in the MDCB exam. These tests will help students to test their knowledge and improve their test-taking speed.

Now revised to reflect the new, clinically-focused certification exams, **Review of Radiological Physics, Fourth Edition**, offers a complete review for radiology residents and radiologic technologists preparing for certification. . This new edition covers x-ray production and interactions, projection and tomographic imaging, image quality, radiobiology, radiation protection, nuclear medicine, ultrasound, and magnetic resonance – all of the important physics information you need to understand the factors that improve or degrade image quality. Each chapter is followed by 20 questions for immediate self-assessment, and two end-of-book practice exams, each with 100 additional questions, offer a comprehensive review of the full range of topics.

Designed specifically for the Core Exam, **Vascular and Interventional Radiology : A Core Review** covers all key aspects of the field, mimicking the image-rich, multiple-choice format of the actual test. Ideal for residents preparing for the Core Examination, as well as practitioners taking recertification exams, this unique review follows the structure and content of what you ' ll encounter on the test, effectively preparing you for Core Exam success!

Top Score for the Radiology Boards: Q & A for the Core and Certifying Exams is the ideal diagnostic radiology board prep resource. Written by radiologist Alan Weissman, with contributions from dozens of leading experts at renowned institutions, Top Score has a simple ambition: to improve your test scores. The book covers all exam categories, including non-interpretive skills (NIS), physics, safety, breast, cardiac, diagnostic radiology, gastrointestinal, genitourinary, interventional, musculoskeletal, neuroradiology, nuclear, pediatrics, thoracic, ultrasound/reproductive/endocrinology, vascular, and general radiology. Chapters are composed of four types of test cases of varying focus and complexity, each on a two-page spread. Essentials starts with a patient presentation, followed by board-type multiple-choice questions. Details begins with a case presentation, followed by 10 rapid-fire questions, enabling brisk, high-volume learning. Image Rich presents multiple images that require accurate identification, enabling accelerated, high-volume image assessment practice. More Challenging follows the same format as Essentials but adds a higher degree of difficulty. Key highlights High-quality, board-type Q&A with detailed answer explanations High yield "Top Tips" for each case Special radiology artifacts section Image Rich and Details sections aid in rapid and lasting topic mastery Comprehensive review, covering all sections tested by the American Board of Radiology Written by experienced, expert question writers NIS chapter emphasizes proficiency in vital practice-related skills This quintessential home-study guide will help radiology residents and fellows prep for and ace both the certifying and core exams.

This robust study guide is ideal for American Board of Radiology (ABR) exam preparation, mirroring the syllabus in the new Noninterpretive Skills (NIS) module for the Core, Certifying, and Maintenance of Certification exams. Skilled radiologists with NIS expertise provide boardtype questions and high-yield pearls on why the keys to a successful radiology practice involve more than "just reading 'em right." The ABR safeguards the public through careful licensing of radiologists who demonstrate the highest commitment to competence, professionalism, and safety. The NIS module was created in response to the fact that radiologists tend to be primarily diagnosis-oriented, but also need to master other important skills to attain and maintain excellence as practitioners. Select Features Included are a wide range of high-yield questions with detailed answers. Patient safety, radiation safety, effective patient communication, error prevention, quality improvement, contrast reaction management, MRI contraindications, and more, are all discussed. The business of radiology: professionalism, best practices, key performance measures, malpractice, ethics, critical thinking, and more, are explained. Six Sigma and Lean-highly regarded improvement methodologies-are discussed in cogent,easily relatable language. Abundant memory aids in the form of mnemonics and tips are interfused throughout the text. The reader-friendly text and tips format, coupled with the well-written Q & A format, enable proficient learning of a large depth and breadth of material. Radiology residents who utilize this rigorous ABR exam prep will gain the confidence to attain top scores on the NIS portion of the boards. This book is also an essential resource for established radiologists preparing for the MOC exam.

These new print editions are the abridged companions to Radiology Simplified, the first resident-to-resident guide to the new ABR Core Exam designed specifically for the iPhone, iPad and Mac. Our hope is that the hundreds of R3 residents who study from our eBooks version this year will empower themselves with the print editions to unplug from the Internet during some of their study time.Because the print versions are abridged, we've left content that works well in electronic medium ? cine clips, embedded presentations, web links - exclusively to the eBooks version. We've also tried where possible to remind you when there's more content to explore in the electronic version. The print editions integrate corrections from hundreds of residents, which are also incorporated into the eBooks version on a continual basis through updates. Because we'll only be updating the print version once per year, the eBooks version will continue to be the most up-to-date version throughout the academic year.Core Cases 2016-2017, Volume 1 .Our take on the best Core-focused cases in these topic areas: breast Imaging, cardiac Imaging, gastrointestinal, genitourinary Imaging, and musculoskeletal. Excludes cine content and web links.Core Cases 2016-2017, Volume 2 .Our take on the best Core-focused cases in these topic areas: neuroradiology, nuclear radiology, pediatric radiology, thoracic imaging, ultrasound, vascular and interventional radiology. Excludes cine content and web links.Core Physics 2016-2017. The abridged need-to-know Core physics coverage. Excludes web links and integrated presentations.

Complete with more than 2,000 questions and answers, the third edition of Nuclear Medicine Board Review: Questions and Answers for Self-Assessment fully prepares readers for certification or re-certification exams administered by the American Board of Radiology, the American Board of Nuclear Medicine, the Certification Board of Nuclear Cardiology, and the Nuclear Medicine Technology Certification Board. It is also a handy reference for residents, clinicians, and technicians, as it contains up-to-date coverage of all major advances in the field.Special features of the third edition: Updated chapters on PET/CT: new technology, NOPR coverage issues, and dementia imaging Many questions and answers on the expanding modality of SPECT/CT Chapter on radionuclide therapy updated to include extensive information on radioimmunotherapy of lymphoma and Y-90 SIRT of hepatic malignancies Important new data on radiation safety requirements and NRC regulations Designed to enhance retention, comprehension, and self-assessment, this concise text is ideal for all those who need a quick and efficient review for board exams.
