'Achtung-Panzer' is a significant piece of military history. Written
in 1937 by Heinz Guderian, a World War I veteran, member of the
German General Staff, and later a General in WWII - the book
explores the application of motorized warfare (largely unexplored at
the time of its publication), and argues for the use of tanks, highly
mobile mechanized infantry, aircraft and paratroopers in what ...

century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, *Achtung Panzer!* argues how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

General Heinz Guderian's revolutionary strategic vision and his skill in armored combat brought Germany its initial victories during World War II. Combining Guderian's land offensive with Luftwaffe attacks, the Nazi Blitzkrieg decimated the defenses of Poland, Norway, France and, very neatly, Russia at the war's outset. But in 1941, when Guderian advised that ground forces should take a step back, Hitler dismissed him. In these pages, the outspoken general shares his candid point of view on what would have led Germany to victory, and what ensured that it didn't. In addition to providing a rare inside look at key members of the Nazi party, Guderian reveals in detail how he developed the Panzer tank forces and orchestrated their various campaigns, from the breakthrough at Sedan to his drive to the Channel coast that virtually decided the Battle of France. *Panzer Leader* became a bestseller within one year of its original publication in 1952 and has since been recognized as a classic account of the greatest conflict of our time.

Probably the most famous tank of World War II, the Tiger I was originally conceived in 1941 in response to the German Army's experience in fighting British tanks and anti-tank guns in Western Europe and the North African desert. Following the invasion of Russia, the appearance of the Soviet T-34 and KW tanks lent a further impetus to the programme and 1,350 Tigers were produced between August 1942 and August 1944. The Tiger has proved to be one of the most popular modelling subjects of all time, with a vast and ever-increasing range of kits, aftermarket products and references available. This title is a detailed modelling guide on the '1331', 13./SS-Panzer Regiment I, Kursk 1943 in 1/35 scale. This guide forms part of Osprey Modelling 37 Modelling the Tiger I also available as an ebook.

Utilizing hitherto untapped archival sources, Azar Gat overturns recent historiographical trends in the study of British and German armour developments between the two World Wars. He reinstates British pioneering theory and practice as the inspiration for the creators of the Panzer arm that made possible Germany's 'Blitzkrieg' victories in the opening stage of World War II.
