New 2013 Pap Smear Recommendations. The American College of Obstetricians and Gynecologists
(ACOG) recently came out with new Pap smear guidelines. Women should have their first screening
Pap smear at age 21 unless the woman has had a previous abnormal Pap smear. Women in their 20's
should have a Pap smear every two years (assuming prior Pap smears have been normal). Women age 30
and older who have had three consecutive normal Pap smears should have a Pap smear every three years.
Women who ...*

Download Ebook Acog Guidelines For Pap 2013 ACS recommends cervical cancer screening with an HPV test alone every 5 years for everyone with a cervix from age 25 until age 65. If HPV testing alone is not available, people can get screened with an HPV/Pap cotest every 5 years or a Pap test every 3 years. Bing: Acog Guidelines For Pap 2013

The gold-standard guide from the AAP and ACOG -- newly updated and more valuable than ever! Significantly revised and updated, the new 8th edition of this bestselling manual provides the latest

Download Free Acog Pap Guidelines 2013 Algorithm

recommendations on quality care of pregnant women, their fetuses, and their newborn infants. Jointly developed by the American Academy of Pediatrics (AAP) and American College of Obstetricians and Gynecologists (ACOG), this unique resource addresses the full spectrum of perinatal medicine from both the obstetric and pediatric standpoints. New in the 8th edition: New section on suggested levels of maternal care from birth centers to Level IV institutions New sections on screening for preterm delivery risk added to chapter on antepartum care New topics covered include the timing of cord clamping, the need (or not) for bedrest, and updates in hypertension Guidance regarding postpartum contraception recommendations has been expanded New section on mosquito-borne illnesses (including Zika) New section on infections with high-risk infection control issues Updated recommendations on neonatal resuscitation, screening and management of hyperbilirubinemia, and neonatal drug withdrawal.

This book offers clear, up-to-date guidance on how to report cytologic findings in cervical, vaginal and anal samples in accordance with the 2014 Bethesda System Update. The new edition has been expanded and revised to take into account the advances and experience of the past decade. A new chapter has been added, the terminology and text have been updated, and various terminological and morphologic questions have been clarified. In addition, new images are included that reflect the experience gained with liquid-based cytology since the publication of the last edition in 2004. Among more than 300 images, some represent classic examples of an entity while others illustrate interpretative dilemmas, borderline cytomorphologic features or mimics of epithelial abnormalities. The Bethesda System for Reporting Cervical Cytology, with its user-friendly format, is a “must have” for pathologists, cytopathologists, pathology residents, cytotechnologists, and clinicians.

"Designed as an informational resource for patients, *Your Pregnancy and Childbirth: Month to Month Seventh Edition* sets forth current information and clinical opinions on subjects related to women's health and reproduction. *Your pregnancy and Childbirth: Month to Month* is a resource for informational purposes. Topics include getting ready for pregnancy choosing an obstetric care provider what to expect during each month of pregnancy exercise during pregnancy work and travel during pregnancy pain relief during childbirth labor and delivery cesarean delivery postpartum care and taking care of the baby after birth, birth control after pregnancy"--

The book provides guidance for conducting a well-woman visit, based on the American College of Obstetricians and Gynecologists Well Woman Task Force recommendations. The scope of problems, the rationale for screening or prevention, and the factors that alter screening are explained, then the recommendations are summarized, and advice is offered on their application.

Despite the common perception that medicine is becoming specialty driven, there are many reasons for primary care providers to offer women's health procedures in an office setting. Women feel more comfortable having procedures done by providers whom they already know and trust. Continuity of care is still valued by patients, who trust their primary care providers to work with them as collaborators in the decision-making process. Women have found that their options for care have become limited, not by their own decision, but by the lack of training of their provider. In rural areas, the barriers of time, expense, and travel often prevent many women from obtaining necessary care; yet many of the

Download Free Acog Pap Guidelines 2013 Algorithm

procedures that these women are requesting are relatively easy to learn. Positive experiences are shared by women who then refer friends and family by word of mouth. This book has been designed to assist not only the clinician performing the procedures covered, but also the office staff with setting up the equipment tray prior to performing the procedure and with preparing office documents and coding information needed to complete the procedure. Most procedures covered can be done with a minimum investment in equipment and require minimal training.

Significantly reduced price. Edited by Jean R. Anderson. This guide addresses the health care needs unique to women with HIV. It targets clinicians who provide primary care to women as well as those seeking an understanding of how to take care of women with HIV/AIDS. This guide includes tables, figures, color plates, resources, references, and indices. This 2005 edition includes new chapters on international issues and nutrition. Edge indexed."

This document is one of two evidence-based cornerstones of the World Health Organization's (WHO) new initiative to develop and implement evidence-based guidelines for family planning. The first cornerstone, the Medical eligibility criteria for contraceptive use (third edition) published in 2004, provides guidance for who can use contraceptive methods safely. This document, the Selected practice recommendations for contraceptive use (second edition), provides guidance for how to use contraceptive methods safely and effectively once they are deemed to be medically appropriate. The recommendations contained in this document are the product of a process that culminated in an expert Working Group meeting held at the World Health Organization, Geneva, 13-16 April 2004.

The Public Health Foundation (PHF) in partnership with the Centers for Disease Control and Prevention (CDC) is pleased to announce the availability of Epidemiology and Prevention of Vaccine-Preventable Diseases, 13th Edition or “The Pink Book” E-Book. This resource provides the most current, comprehensive, and credible information on vaccine-preventable diseases, and contains updated content on immunization and vaccine information for public health practitioners, healthcare providers, health educators, pharmacists, nurses, and others involved in administering vaccines. “The Pink Book E-Book” allows you, your staff, and others to have quick access to features such as keyword search and chapter links. Online schedules and sources can also be accessed directly through e-readers with internet access. Current, credible, and comprehensive, “The Pink Book E-Book” contains information on each vaccine-preventable disease and delivers immunization providers with the latest information on: Principles of vaccination General recommendations on immunization Vaccine safety Child/adult immunization schedules International vaccines/Foreign language terms Vaccination data and statistics The E-Book format contains all of the information and updates that are in the print version, including:

- New vaccine administration chapter
- New recommendations regarding selection of storage units and temperature monitoring tools
- New recommendations for vaccine transport
- Updated information on available influenza vaccine products
- Use of Tdap in pregnancy
- Use of Tdap in persons 65 years of age or older
- Use of PCV13 and PPSV23 in adults with immunocompromising conditions
- New licensure information for varicella-zoster immune globulin

Contact bookstore@phf.org for more information. For more news and specials on immunization and vaccines visit the Pink Book's Facebook fan page

Clinical management algorithms for common and unusual obstetric problems have been developed to

Download Free Acog Pap Guidelines 2013 Algorithm

help guide practitioners to the best treatment options for patients. In this quick-reference guide, clear diagrams and concise notes show treatment options and evidence for over 80 high-risk obstetric complications, presented in two-page full color spreads to promote quick decision making in time-pressed situations. This new edition includes sections on obesity, late-preterm and early term delivery, and pregnancy termination. As a clinical manual, the book provides guidance to many common and less common obstetric situations in which either the mother or her fetus is at risk. An algorithm for each situation provides obstetric care providers with a step-by-step guide of necessary actions for any given clinical case. Written by internationally renowned experts, Clinical Obstetric Algorithms enables all obstetrics care providers to ensure delivery of a healthy mother and a healthy baby.
