The Supplement includes the entire Uniform Commercial Code as of May 2019, excluding Article 6, and a selection of other federal statutes and regulations, uniform state laws, and Restatement provisions, aiming to include those items most commonly used in commercial law courses: the Truth in Lending Act, the Electronic Funds Transfer Act, the Federal Tax Lien Act, the Uniform Electronic Transactions Act, excerpts from the CISG, and excerpts from the ICC's uniform rules for letters of credit. The Bankruptcy Code, as of June 1, 2019, is reproduced in full. Unlike the UCC, there are no official comments for the Bankruptcy Code, and the legislative history is spotty at best. As a result, only the Code is offered here. In addition, selections from Title 18 and Title 28 of the United States Code that are relevant to bankruptcy law are included. New to the 2019 Edition: Section 104(b) of the Bankruptcy Code, including the current dollar amounts, amended as of April 1, 2019 Revisions to Regulation E

This book explores the problems and application of agency law in commercial practice. Moving beyond the limited introductory resources currently available, it "tests" abstract agency law concepts in specific commercial contexts, with reference to jurisdictions around the world. There is an enduring commonality of concepts and principles within agency law, both within the Commonwealth and within the jurisdictions of the United States. The book's comparative approach, drawing together analysis of national and international jurisdictions, provides innovative perspectives and insights, as well as practical guidance on solving commercial problems. The book opens with a detailed introductory chapter which provides a broad overview of the agency issues arising in specific commercial contexts. The subsequent chapters are grouped thematically: company law, financial transactions and services, sale of goods; as well as agency in procedural contexts. Topics covered include the role of the director and directorial board in company law and agency law, agency in shipping law, undisclosed principal in sale of goods cases, regulation of conflicts of interest in securities transactions, poseur-agents and transactional intermediation, the operation of agency in retail financial services, the agent's warranty of authority, and power of attorney. This book is an invaluable resource on both agency theory and commercial practice.

Law" deal with commercial agency, franchise and distribution contracts, and with other contracts where one party uses the other party's skill and efforts to bring its products to the market. Although these Principles are not directly applicable to other long-term (commercial) contracts, some of the Articles may be applied to such contracts by way of analogy where appropriate. The economic function of all three contracts is that they are instrumental in bringing products to the market. They are so-called vertical agreements, as they are agreements between economic actors on different levels in the production and distribution chain. Obviously, the economic importance of these contracts is enormous since they form the connection between producers and retailers who sell the products to consumers and other final users. There are only very few economic sectors where producers regularly sell their products directly to final consumer users. Goodwill compensation after the ending of a distribution contract, the moment at which the agent's commission is due, the franchisor's obligation to maintain the good reputation of the network are but a few examples of issues where specific rules are needed in order to give legal practice some guidance and to provide practitioners with a reasonable degree of legal certainty.
