From New York Times-bestselling author Nick Bilton comes a true-life thriller about the rise and fall of Ross Ulbricht, aka the Dread Pirate Roberts, the founder of the online black market Silk Road.

NEW YORK TIMES BESTSELLER. The unbelievable true story of the man who built a billion-dollar online drug empire from his bedroom—and almost got away with it In 2011, a twenty-six-year-old libertarian programmer named Ross Ulbricht launched the ultimate free market: the Silk Road, a clandestine Web site hosted on the Dark Web where anyone could trade anything—drugs, hacking software, forged passports, counterfeit cash, poisons—free of the government ' s watchful eye. It wasn ' t long before the media got wind of the new Web site where anyone—not just teenagers and weed dealers but terrorists and black hat hackers—could buy and sell contraband detection-free. Spurred by a public outcry, the federal government launched an epic two-year manhunt for the site ' s elusive proprietor, with no leads, no witnesses, and no clear jurisdiction. All the investigators knew was that whoever was running the site called himself the Dread Pirate Roberts. The Silk Road quickly ballooned into \$1.2 billion enterprise, and Ross embraced his new role as kingpin. He enlisted a loyal crew of allies in high and low places, all as addicted to the danger and thrill of running an illegal marketplace as their customers were to the heroin they sold. Through his network he got wind of the target on his back and took drastic steps to protect himself—including ordering a hit on a former employee. As Ross made plans to disappear forever, the Feds raced against the clock to catch a man they weren ' t sure even existed, searching for a needle in the haystack of the global Internet. Drawing on exclusive access to key players and two billion digital words and images Ross left behind, Vanity Fair correspondent and New York Times bestselling author Nick Bilton offers a tale filled with twists and turns, lucky breaks and unbelievable close calls. It ' s a story of the boy next door ' s ambition gone criminal, spurred on by the clash between the new world of libertarian-leaning, anonymous, decentralized Web advocates and

the old world of government control, order, and the rule of law. Filled with unforgettable characters and capped by an astonishing climax, American Kingpin might be dismissed as too outrageous for fiction. But it ' s all too real.

A New York Times bestseller Ev told Jack he had to "chill out" with the deluge of media he was doing. "It's bad for the company," Ev said. "It's sending the wrong message." Biz sat between them, watching like a spectator at a tennis match. "But I invented Twitter," Jack said. "No, you didn't invent Twitter," Ev replied. "I didn't invent Twitter either. Neither did Biz. People don't invent things on the Internet. They simply expand on an idea that already exists." Despite all the coverage of Twitter's rise, Nick Bilton of The New York Times is the first journalist to tell the full story—a gripping drama of betrayed friendships and highstakes power struggles. The four founders—Evan Williams, Biz Stone, Jack Dorsey, and Noah Glass—made a dizzyingly fast transition from ordinary engineers to wealthy celebrities. They fought each other bitterly for money, influence, publicity, and control as Twitter grew larger and more powerful. Ultimately they all lost their grip on it. Bilton's unprecedented access and exhaustive reporting have enabled him to write an intimate portrait of four friends who accidentally changed the world, and what they all learned along the way.

The incredible true story of the decade-long quest to bring down Paul Le Roux--the creator of a frighteningly powerful Internet-enabled cartel who merged the ruthlessness of a drug lord with the technological savvy of a Silicon Valley entrepreneur "Evan Ratliff has pried open a hidden world of high-tech gangsters and drug kingpins and double-crossers and stone-cold hitmen."--David Grann, author of Killers of the Flower Moon It all started as an online prescription drug network, supplying hundreds of millions of dollars' worth of painkillers to American customers. It would not stop there. Before long, the business had turned into a sprawling multinational conglomerate engaged in almost every conceivable aspect of criminal mayhem. Yachts carrying \$100 million in cocaine. Safe houses in Hong Kong filled with gold bars. Shipments of methamphetamine from North Korea. Weapons deals with Iran. Mercenary armies in Somalia. Teams of hit men in the Philippines. Encryption programs so advanced that the government could not break them. The man behind it all, pulling the strings from a laptop in Manila, was Paul Calder Le Roux--a reclusive programmer turned criminal genius who could only exist in the networked world of the twenty-first century, and the kind of self-made crime boss that American law enforcement had never imagined. For half a decade, DEA agents played a global game of cat-and-mouse with Le Roux as he left terror and chaos in his wake. Each time they came close, he would slip away. It would take relentless investigative work, and a shocking betrayal from within his organization, to catch him. And when he was finally caught, the story turned again, as Le Roux struck a deal to bring down his own organization and the people he had once employed. Award-winning investigative journalist Evan Ratliff spent four years piecing together this intricate puzzle, chasing Le Roux's empire and his shadowy henchmen around the world, conducting hundreds of interviews and uncovering thousands of documents. The result is a riveting, unprecedented account of a crime boss built by and for the digital age. Advance praise for The Mastermind "A true crime classic"--Publishers Weekly (starred review) "If truth is stranger than fiction, then The Mastermind is the truest book you'll read this year. The only thing predictable about it is how quickly you'll turn the pages."--Noah Hawley, author of Before the Fall and creator of the TV series Fargo

SILK ROAD lay at the heart of the 'Dark Web' - a parallel internet of porn, guns, assassins and drugs. Lots of drugs. With the click of a button LSD, heroin, meth, coke, any illegal drug imaginable, would wing its way by regular post from any dealer to any user in the world. How was this online drug cartel even possible? And who was the mastermind all its low roads led to? This is the incredible true story of Silk Road's rise and fall, told with unparalleled insight into the main players - including alleged founder and kingpin Dread Pirate Roberts himself - by lawyer and investigative journalist Eileen Ormsby. PREVIEW: American Kingpin: The Epic Hunt for the Criminal Mastermind Behind the Silk Road by Nick Bilton tells the story of Ross Ulbricht, the founder of an illegal website that helped people buy and sell illicit goods anonymously. The author traces how Ross transformed his nascent idea for an "eBay for drugs" on the Dark Web into a multimillion dollar business, as well as the team of crafty feds who brought him down-and ultimately put him behind bars for life. Ross was a 24-year-old graduate student at Penn State when he met his girlfriend, Julia. He was politically active on campus to the point where his libertarianism distracted him from his studies, which led to a dismissal from his PhD program in 2010. Julia quit school and followed him to Austin, Texas, where his family lived. After a handful of failed business ventures, Ross began working long hours to develop an idea he'd been toying with for some time: an online marketplace where people could buy and sell anything from drugs to guns without fearing for their safety or privacy. The recent invention of Bitcoin had made his pipe dream realistic, and he was so excited that he worked long hours teaching himself the code he needed to build the site. By 2011, it was ready. Using an alias, Ross left a few messages advertising its existence on drug-related forums. That's all it took to launch his website, the Silk Road.

The true story of Max Butler, the master hacker who ran a billion dollar cyber crime network. The word spread through the hacking underground like some unstoppable new virus: an audacious crook had staged a hostile takeover of an online criminal network that siphoned billions of dollars from the US economy. The culprit was a brilliant programmer with a hippie ethic and a supervillain's double identity. Max 'Vision' Butler was a white-hat hacker and a celebrity throughout the programming world, even serving as a consultant to the FBI. But there was another side to Max. As the black-hat 'Iceman', he'd seen the fraudsters around him squabble, their ranks riddled with infiltrators, their methods inefficient, and in their dysfunction was the ultimate challenge: he would stage a coup and steal their ill-gotten gains from right under their noses. Through the story of Max Butler's remarkable rise, KINGPIN lays bare the workings of a silent crime wave affecting millions worldwide. It exposes vast online-fraud supermarkets stocked with credit card numbers, counterfeit cheques, hacked bank accounts and fake passports. Thanks to Kevin Poulsen's remarkable access to both cops and criminals, we step inside the quiet,desperate battle that law enforcement fights against these scammers. And learn that the boy next door may not be all he seems.
