China's Response to American Allegations on COVID-19. By Yvonne Lorenzo. March 13, 2020. Donate. As if coping with COVID-19 is not enough, American government officials and media are attacking China, I believe without facts and frequently with misplaced malice. I think that now whether or not COVID-19 was manufactured or not is less relevant to coping with the Pandemic in America and the world.

This comes at a time when American foreign policy has become defined by its opposition to China and Russia, with Washington labelling them as "revisionist powers". Bolton's announcement not only highlighted some common problems with established readings of China's Africa policies, which often overlook how Beijing has been able to cement its influence across the continent, but also underlined common flaws in Washington's response to China, which are the result of such an ...

assessment of an increasingly complicated relationship. Written by one of America's leading diplomatic historians, this book analyzes the concerns and conceptions that have shaped U.S.-China policy and examines their far-reaching outcomes. Warren I. Cohen begins with the mercantile interests of the newly independent American colonies and discusses subsequent events up to the Tiananmen Square massacre and the policies of George H. W. Bush and Bill Clinton. For this fifth edition, Cohen adds a chapter on America in the age of potential Chinese ascendance, envisioning future partnerships and the shrinking global influence of the United States. Trenchant and insightful, *America's Response to China* is critically important for understanding U.S.-China relations in the twenty-first century.

An examination of the U.S.-China relationship that charts a new path for America focusing on its existing advantages Ryan Hass charts a path forward in America's relationship and rivalry with China rooted in the relative advantages America already possesses. Hass argues that while competition will remain the defining trait of the relationship, both countries will continue to be impacted--for good or ill--by their capacity to coordinate on common challenges that neither can solve on its own, such as pandemic disease, global economic recession, climate change, and nuclear nonproliferation. Hass makes the case that the United States will have greater success in outpacing China economically and outshining it in questions of governance if it focuses more on improving its own condition at home than on trying to impede Chinese initiatives. He argues that the task at hand is not to stand in China's way and turn a

rising power into an enemy in the process but to renew America's advantages in its competition with China.

For more than a century, no US adversary or coalition of adversaries - not Nazi Germany, Imperial Japan, or the Soviet Union - has ever reached sixty percent of US GDP. China is the sole exception, and it is fast emerging into a global superpower that could rival, if not eclipse, the United States. What does China want, does it have a grand strategy to achieve it, and what should the United States do about it? In *The Long Game*, Rush Doshi draws from a rich base of Chinese primary sources, including decades worth of party documents, leaked materials, memoirs by party leaders, and a careful analysis of China's conduct to provide a history of China's grand strategy since the end of the Cold War. Taking readers behind the Party's closed doors, he uncovers Beijing's long, methodical game to displace America from its hegemonic position in both the East Asia regional and global orders through three sequential "strategies of displacement." Beginning in the 1980s, China focused for two decades on "hiding capabilities and biding time." After the 2008 Global Financial Crisis, it became more assertive regionally, following a policy of "actively accomplishing something." Finally, in the aftermath populist elections of 2016, China shifted to an even more aggressive strategy for undermining US hegemony, adopting the phrase "great changes unseen in century." After charting how China's long game has evolved, Doshi offers a comprehensive yet asymmetric plan for an effective US response. Ironically, his proposed approach takes a page from Beijing's own strategic playbook to undermine China's ambitions and strengthen American order without competing dollar-for-dollar, ship-for-ship, or loan-for-loan.

strength and watchfulness but not fall into the classic security dilemma, wherein each side believes that growing capabilities reflect hostile intent and responds by producing that reality. I believe that President Obama struck that balance. From Obama and China's Rise In 2005, veteran diplomat and Asia analyst Jeffrey Bader met for the first time with the then-junior U.S. senator from Illinois. When Barack Obama entered the White House a few years later, Bader was named the senior director for East Asian affairs on the National Security Council, becoming one of a handful of advisers responsible for formulating and implementing the administration's policy regarding that key region. For obvious reasons—a booming economy, expanding military power, and increasing influence over the region—the looming impact of a rising China dominated their efforts. Obama's original intent was to extend U.S. influence and presence in East Asia, which he felt had been neglected by a Bush administration fixated on the Middle East, particularly Iraq, and the war on terror. China's rise, particularly its military buildup, was heightening anxiety among its neighbors, including key U.S. allies Japan and South Korea. Bader explains the administration's efforts to develop stabler relations with China while improving relationships with key partners worried about Beijing's new assertiveness. In *Obama and China's Rise*, Bader reveals what he did, discusses what he saw, and interprets what it meant—first during the Obama campaign, and then for the administration. The result is an illuminating backstage view of the formulation and execution of American foreign policy as well as a candid assessment of both. Bader combines insightful and authoritative foreign policy analysis with a revealing and humanizing narrative of his own personal journey.

While Americans are generally aware of China's ambitions as a global economic and military superpower, few understand just how deeply and assertively that country has already sought to influence American society. As the authors of this volume write, it is time for a wake-up call. In documenting the extent of Beijing's expanding influence operations inside the United States, they aim to raise awareness of China's efforts to penetrate and sway a range of American institutions: state and local governments, academic institutions, think tanks, media, and businesses. And they highlight other aspects of the propagandistic "discourse war" waged by the Chinese government and Communist Party leaders that are less expected and more alarming, such as their view of Chinese Americans as members of a worldwide Chinese diaspora that owes undefined allegiance to the so-called Motherland. Featuring ideas and policy proposals from leading China specialists, *China's Influence and American Interests* argues that a successful future relationship requires a rebalancing toward greater transparency, reciprocity, and fairness. Throughout, the authors also strongly state the importance of avoiding casting aspersions on Chinese and on Chinese Americans, who constitute a vital portion of American society. But if the United States is to fare well in this increasingly adversarial relationship with China, Americans must have a far better sense of that country's ambitions and methods than they do now.

Robert D. Blackwill and Ashley J. Tellis argue that the United States has responded inadequately to the rise of Chinese power. This Council Special Report recommends placing less strategic emphasis on the goal of integrating China into the international system and more on balancing China's rise.

Woodward and acclaimed reporter Robert Costa reveal for the first time, it was far more than just a domestic political crisis. Woodward and Costa interviewed more than 200 people at the center of the turmoil, resulting in more than 6,000 pages of transcripts—and a spellbinding and definitive portrait of a nation on the brink. This classic study of Washington takes readers deep inside the Trump White House, the Biden White House, the 2020 campaign, and the Pentagon and Congress, with vivid, eyewitness accounts of what really happened. *Peril* is supplemented throughout with never-before-seen material from secret orders, transcripts of confidential calls, diaries, emails, meeting notes and other personal and government records, making for an unparalleled history. It is also the first inside look at Biden's presidency as he faces the challenges of a lifetime: the continuing deadly pandemic and millions of Americans facing soul-crushing economic pain, all the while navigating a bitter and disabling partisan divide, a world rife with threats, and the hovering, dark shadow of the former president. "We have much to do in this winter of peril," Biden declared at his inauguration, an event marked by a nerve-wracking security alert and the threat of domestic terrorism. *Peril* is the extraordinary story of the end of one presidency and the beginning of another, and represents the culmination of Bob Woodward's news-making trilogy on the Trump presidency, along with *Fear and Rage*. And it is the beginning of a collaboration with fellow Washington Post reporter Robert Costa that will remind readers of Woodward's coverage, with Carl Bernstein, of President Richard M. Nixon's final days.
