In the first book to argue for the benefits of boredom, Peter Toohey dispels the myth that it's simply a childish emotion or an existential malaise like Jean-Paul Sartre's nausea. He shows how boredom is, in fact, one of our most common and constructive emotions and is an essential part of the human experience. This informative and entertaining investigation of boredom--what it is and what it isn't, its uses and its dangers--spans more than 3,000 years of history and takes readers through fascinating neurological and psychological theories of emotion, as well as recent scientific investigations, to illustrate its role in our lives. There are Australian aboriginals and bored Romans, Jeffrey Archer and caged cockatoos, Camus and the early Christians, Durer and Degas. Toohey also explores the important role that boredom plays in popular and highbrow culture and how over the centuries it has proven to be a stimulus for art and literature. Toohey shows that boredom is a universal emotion experienced by humans throughout history and he explains its place, and value, in today's world. "Boredom: A Lively History" is vital reading for anyone interested in what goes on when supposedly nothing happens.

Migration among the Bassari people of eastern Senegal has produced an apparent paradox: villages are experiencing rapid and profound change as they are being incorporated into larger national structures and, at the same time, village institutions remain largely untouched. In this book, Dr. Nolan examines both the causes and consequences of migration from the Bassari village of Etyolo. Through extensive fieldwork spanning eight years, he shows how rural and urban areas have interacted over time. Although levels of both seasonal and long-term migration have become substantial, agricultural productivity remains stable and traditional practices persist. Dr. Nolan explains how the effects of migration have been controlled and shaped and discusses how migration may even have strengthened the village power structure. Returning migrants contribute cash and goods to the village economy but do not act as dissidents or innovators. However, Dr. Nolan points to adverse effects migration may have in the future and indicates what the first signs of stress may be.
