The book is a cutting-edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work. The book provides concrete examples of the vocationalisation of secondary education, with particular reference to the situation in Africa. The target audience for the book includes policy-makers, practitioners, administrators, education planners, researchers, teachers and teacher educators with a concern about the relationship between secondary education and education for the world of work (with particular reference to technical and vocational education and training - TVET.) The book appears in the Springer book series on 'Technical and Vocational Education and Training: Issues, Concerns and Prospects' and compliments the 'International Handbook of Technical and Vocational Education and Training' and other publications in the 'International Library of TVET' all of which are publications of the 'UNESCO-UNEVOC International Centre for TVET' in Bonn, Germany

Education in East and Central Africa is a comprehensive critical reference guide to education in the region. With chapters written by an international team of leading regional education experts, the book explores the education systems of Djibouti, Eritrea, Ethiopia, Kenya, Somalia, South Sudan, Tanzania, Uganda, Zambia, Angola, Burundi, the Central African Republic, the Democratic Republic of Congo, Equatorial Guinea and Sao Tome, Gabon, the Republic of Congo and Rwanda. The book critically examines the regional development of education provision in each country as well as recent reforms and global contexts. Including a comparative introduction to the issues facing education in the region as a whole and guides to available online datasets, this handbook is an essential reference for researchers, scholars, international agencies and policy-makers at all levels.

The role of higher education in establishing structures and procedures in society and industry is clearly articulated in scholarly discussions. The narrative has recently taken a new momentum in Kenya with acknowledgement of the creative industry involves many youth, as an area that impacts on the economy. In unravelling the link between higher education and industry, the authors focus on leadership and governance in higher education and its expected and perceived contribution to the shaping of the creative industry. Through analysis of cases, the authors interrogate the processes and structures that govern the teaching and practice of the creative subjects, noting how these affect the creative industry in Kenya. This book approaches the creative disciplines from the perspectives of the students, lecturers and university administrators. The three voices provide a balanced view of what higher creative arts education in Kenya is. The multiple authorship of the book further provides a balanced account of the development of these disciplines in higher education, and their growth in industry. The key concepts here are the development of the creative industry and how higher education should contribute to the same.
