The 10th anniversary edition, with new chapters on the crash, Chimerica, and cryptocurrency "[An] excellent, just in time guide to the history of finance and financial crisis." —The Washington Post "Fascinating." —Fareed Zakaria, Newsweek In this updated edition, Niall Ferguson brings his classic financial history of the world up to the present day, tackling the populist backlash that followed the 2008 crisis, the descent of "Chimerica" into a trade war, and the advent of cryptocurrencies, such as Bitcoin, with his signature clarity and expert lens. The Ascent of Money reveals finance as the backbone of history, casting a new light on familiar events: the Renaissance enabled by Italian foreign exchange dealers, the French Revolution traced back to a stock market bubble, the 2008 crisis traced from America's bankruptcy capital, Memphis, to China's boomtown, Chongqing. We may resent the plutocrats of Wall Street but, as Ferguson argues, the evolution of finance has rivaled the importance of any technological innovation in the rise of civilization. Indeed, to study the ascent and descent of money is to study the rise and fall of Western power itself.

A lost prince Between years surviving on the streets and an ill-advised stint with Kien's group of half-blood fae, Fen has seen his fair share of darkness. Sure, he helped capture Kien and put an end to the trouble he caused, but his actions contributed to one of the greatest upheavals of all—the return of magic to Earth. Now Fen's mother has named him the heir to the Unseelie throne, and he has discovered he has two mates he is unworthy to claim. A deadly healer The daughter of a Seelie artisan and a human woman, Maddy can't find anyone among her father's people willing to teach her to heal without causing harm. But finally, she has hope—a healer on Morania has agreed to help her. The problem? Maddy will have to travel to their world, leaving her girlfriend Anna unprotected on Earth. For the return of magic has awakened Anna's latent water abilities, and the temptation of the nearby river could prove too much without Maddy near. A canny enemy When a slip of the tongue reveals that Fen could share a mate bond with both Maddy and Anna, all three must come to terms with their insecurities—and quickly. The poison they believed eradicated has appeared again, and Meren, the traitorous Seelie noble who had once worked with Kien, has returned from hiding. Together, Anna, Fen, and Maddy might be able to defeat the rising threat. But first, they must conquer their pasts.

Charles Eisenstein explores the history and potential future of civilization, tracing the converging crises of our age to the illusion of the separate self. In this limited hardcover edition of Eisenstein's landmark book, he argues that our disconnection from one another and the natural world has mislaid the foundations of science, religion, money, technology, economics, medicine, and education as we know them. It has fired our near-pathological pursuit of technological Utopias even as we push ourselves and our planet to the brink of collapse. Fortunately, an Age of Reunion is emerging out of the birth pangs of an earth in crisis. Our journey of separation hasn't been a terrible mistake but an evolutionary process and an adventure in self-discovery. Even in our darkest hour, Eisenstein sees the possibility of a more beautiful world—not through the extension of millennia-old methods of management and control but by fundamentally reimagining ourselves and our systems. We must shift away from our Babelian efforts to build ever-higher towers to heaven and instead turn out attention to creating a new kind of civilization—one designed for beauty rather than height. Breathtaking in its scope and intelligence, The Ascent of Humanity is a landmark book showing what it truly means to be human. "A tour-de-force filled with astounding insight, wit, wisdom and heart." --Christopher Uhl, author of Developing Ecological Consciousness: Paths to a Sustainable Future "Quite marvelous, a hugely important work. This book is truly needed in this time of deepening crisis." --John Zerzan, author of Future Primitive and Elements of Refusal

Originally published in 1970. This book is a collection of lectures and papers given by Professor Findlay in the 1960s. The theme is an argument for a metaphysical Absolute, in the sense of post-Hegelian Idealism. Findlay's word for the Absolute process is 'Enterprise', which must be necessary in thought and reality. This ontological argument goes further that previous cosmological arguments and addresses both traditions from ancient philosophy and the modern Anglo-American school of philosophy. The book discusses the case for a Perfect Being, a Necessary Being and, in a change to Findlay's previous published thought, presents a case for mysticism.
