The #1 New York Times best-selling story
about the American Olympic rowing
triumph in Nazi Germany from the author

of Facing the Mountain. Soon to be a major motion picture directed by George Clooney For readers of Unbroken, out of the depths of the Depression comes an irresistible story about beating the odds and finding hope in the most desperate of times—the improbable, intimate account of how nine working-class boys from the American West showed the world at the 1936 Olympics in Berlin what true grit really meant. It was an unlikely quest from the start. With a team composed of the sons of loggers, shipyard workers, and farmers, the University of Washington’s eight-oar crew team was never expected to defeat the elite teams of the East Coast and Great Britain, yet they did, going on to shock the world by defeating the German team rowing for Adolf Hitler. The emotional heart of the tale lies with Joe Rantz, a teenager without family or prospects, who rows not only to regain his

shattered self-regard but also to find a real place for himself in the world. Drawing on the boys' own journals and vivid memories of a once-in-a-lifetime shared dream, Brown has created an unforgettable portrait of an era, a celebration of a remarkable achievement, and a chronicle of one extraordinary young man's personal quest.

True cases of boating emergencies and what you can learn from these mishaps. These accounts include valuable feedback from those rescued and their ordeals. This wealth of boating experiences has evolved into an epic boating safety guide. No matter where you boat or your experience level, the entertaining and revealing Boat Smart Chronicles is an absolute must read for all recreational boaters and water enthusiasts.

Since the Titanic disaster of 1912, the horrors of major maritime casualties have prompted international conventions and domestic legislation, but the link between events and outcomes (which are often separated by many years) is rarely understood by those working in the maritime industry. This book, the only comprehensive guide to this link, sets forth the major casualties of the last hundred years and explains resulting regulatory changes. Taking a macro-level view, it describes the trends and reactions across decades, and how, over time, focus has shifted from equipment failures to people and their behaviours as the primary cause of maritime casualties. Timely and thorough, it also explores the alarming increase in the criminalization of maritime accidents, especially the relatively recent reclassification of pollution incidents as "environmental crimes". This book offers

broad insight to the history, laws, and conventions that regulate worldwide commercial maritime activity.
