a Team, Patrick Lencioni laid out a groundbreaking approach for tackling the perilous group behaviors that destroy teamwork. Here he turns his focus to the individual, revealing the three indispensable virtues of an ideal team player. Jeff must crack the code on the virtues that real team players possess, and then build a culture of hiring and development around those virtues. From the New York Times bestselling author of Start With Why and Leaders Eat Last, a bold framework for leadership in today's ever-changing world. How do we win a game that has no end? Finite games, like football or chess, have known players, fixed rules and a clear endpoint. The winners and losers are easily identified. compact, complete guide, Whitney Johnson dives more more deeply than ever into the S Curve of Learning so that you can envision how growth happens and direct yourself and others in your organization to create a culture that fosters it. The growth and learning journey comes in three phases: the Launch Point, the Sweet Spot, and Mastery. Compelling examples of successful people will show you when and why growth is slow, how to keep going, what to do when growth and learning are almost too fast to keep up with, and how to leap from one growth journey to another. As individuals grow, so do organizations and societies. Growth is learning put into action—action that better the world as we better ourselves and our small niches, both personal and professional, within it. Growth occurs when learning is internalized—when we try something new and invest the effort to move it from being something we do to something we are.
