This report examines the use of these entities in nearly all cases of corruption. It builds upon case law, interviews with investigators, corporate registries and financial institutions and a 'mystery shopping' exercise to provide evidence of this criminal practice.

This book examines schemes of arrangement, which are an invaluable tool for reorganising companies' capital.

The Mergers & Acquisitions Review, edited by Mark Zerdin of Slaughter and May, seeks to provide a richer understanding of the shape of M&A in the global markets, together with the challenges and opportunities facing market participants. This comes at a time when the international market has seen a boom in dealmaking, with many markets reaching post-crisis peaks and some recording all-time highs. Mega-deals have been at the heart of the expanding market, with companies tapping into cash piles and cheap debt to fund transformational deals. Looking behind the headline figures, however, a number of factors suggest dealmaking may not continue to grow as rapidly as it has done recently. This book examines this topic and more across over 55 jurisdictions, as well as providing more general interest chapters covering the European Union, European Private Equity, M&A Litigation, and Offshore Private Equity. Contributors include: Didier Marti, Bredin Prat; Heinrich Knepper, Hengeler Mueller; Javier Ruiz-Camara Bayo, Uria Menendez.
