A chatbot is expected to be capable of supporting a cohesive and coherent conversation and be knowledgeable, which makes it one of the most complex intelligent systems being designed nowadays. Designers have to learn to combine intuitive, explainable language understanding and reasoning approaches with high-performance statistical and deep learning technologies. Today, there are two popular paradigms for chatbot construction: 1. Build a bot platform with universal NLP and ML capabilities so that a bot developer for a particular enterprise, not being an expert, can populate it with training data; 2. Accumulate a huge set of training dialogue data, feed it to a deep learning network and expect the trained chatbot to automatically learn "how to chat". Although these two approaches are reported to imitate some intelligent dialogues, both of them are unsuitable for enterprise chatbots, being unreliable and too brittle. The latter approach is based on a belief that some learning miracle will happen and a chatbot will start functioning without a thorough feature and domain engineering by an expert and interpretable dialogue management algorithms. Enterprise high-performance chatbots with extensive domain knowledge require a mix of statistical, inductive, deep machine learning and learning from the web, syntactic, semantic and discourse NLP, ontology-based reasoning and a state machine to control a dialogue. This book will provide a comprehensive source of algorithms and architectures for building chatbots for various domains based on the recent trends in computational linguistics and machine learning. The foci of this book are applications of discourse analysis in text relevant assessment, dialogue management and content generation, which help to overcome the limitations of platform-based and data driven-based approaches. Understanding Digital Cameras will help you to: * Choose the right camera, lens and output option to capture the perfect image * Develop great technique, whatever your style or subject matter * Be inspired! Showcasing a wide range of images, plus the work and insights of guest photographers This key resource for all photographers will help you get the very best from today's sophisticated digital cameras. Discover which type of camera, lens, lighting and printer is right for you with clear explanations and close-ups of camera settings and menus. A key tool to improve your photography is to see comparison images side by side. Tarrant shoots the same scene with different equipment or a different approach, to show exactly what a camera and technique can or can't do. He also shows you images that haven't worked - and explains precisely why. In this book you will learn essential photographic techniques, before moving on to specific genres: people, nature, action shots and working in the studio. Detailed captions throughout explain which camera and lens was used for each shot and highlight key factors in getting the right exposure, lighting and composition. There is an essential troubleshooting guide to printing errors such as smudges, lines and colour casts. Discover how to produce fine art prints and optimize images for the Web. Plus key technical information on digital and optical quality and colour management. Packed with tips, clear explanations, with all photography terms defined, box outs with key information, and showcasing a wide range of image styles and subjects, this book (and a camera!), is all you need to start creating great images! Jon Tarrant has spent many years as an award-winning professional photographer and much-published photographic writer. He is former editor of the British Journal of Photography, to which he still contributes, and of Professional Photographer and HotShoe International magazines. * Choose the right camera, printer and software to capture the perfect image and produce the best print or image for the Web * Improve the creativity of your digital pictures - without having to use a computer * Packed with colour images, diagrams and charts for easy, visual learning!

Brand-new, updated edition of the bestselling book, Drawing Masterclass: Animals by popular artist, Lucy Swinburne. Whether you want to capture a beloved pet cat or a magnificent wolf on paper, this book provides a complete course in how to draw them. All the essential drawing techniques and materials you need are explained clearly and simply by Lucy, and two brand new sections show you how to sketch the key features of a wide variety of animals such as eyes, ears and fur, and how to capture movement. The 20 step-by-step exercises inside draw on a diverse range of subjects from various continents, including meerkats, lizards and horses. This inspiring book is a must-have for any artist seeking to capture the spirit and character of animals in their drawings.

A comprehensive, visually-led overview that covers all areas of fashion drawing, presentation, and illustration, Fashion Illustrator both teaches students how to draw the fashion figure and provides an extended showcase of established and emerging illustrators. A technical chapter outlines the use of different media, showing students how to use colour, and features techniques for rendering different materials and patterns. Dedicated tutorials explore both digital and traditional media through the work of leading fashion illustrators, giving the student the confidence to experiment with different illustrative styles. Later chapters outline the history of both 20th-century and contemporary fashion illustration, and profile influential fashion illustrators and other industry professionals, with interviews providing an insight into life after graduation. From initial inspiration though to finished illustration, the book teaches the student how to draw from life. There is also guidance on careers for the fashion illustrator, portfolio presentation and working with an agent.
