The connoisseur's guide to the typewriter, entertaining and practical What do thousands of kids, makers, poets, artists, steampunks, hipsters, activists, and musicians have in common? They love typewriters—the magical, mechanical contraptions that are enjoying a surprising second life in the 21st century, striking a blow for self-reliance, privacy, and coherence against dependency, surveillance, and disintegration. The Typewriter Revolution documents the movement and provides practical advice on how to choose a typewriter, how to care for it, and what to do with it—from National Novel Writing Month to letter-writing socials, from type-ins to typewritten blogs, from custom-painted typewriters to typewriter tattoos. It celebrates the unique quality of everything typewriter, fully-illustrated with vintage photographs, postcards, manuals, and more.

The 4th International Web Rule Symposium (RuleML 2010), co-located in Alexandria, Virginia, USA (near Washington, DC) with the 13th International BusinessRules Forum Conference2010,wasorganizedto meet colleaguesand to exchange ideas from all subareas of Web rule technology. The aims of RuleML 2010 were both to present new and interesting research results and to show s- cessfullydeployedrule-basedapplications. Thisannualsymposiumisthe?agship event of the Rule Markup Language (RuleML) Initiative. The RuleML Initiative (www.ruleml.org) is a non-pro?t umbrella organi- tion of several technical groups organized by representatives from academia, industry and public sectors working on rule technologies and applications. Its aim is to promote the study, research and application of rules in heterogeneous distributedenvironmentssuchastheWeb. RuleMLmaintainse?ectivelinkswith other major international societies and acts as an intermediary between various “ specialized ” rule vendor, application, industrial and academic research groups, as well as standardization e?orts including W3C, OMG and OASIS. After a series of successful international RuleML workshops and conferences, the RuleML symposia, held since 2007, constitute a new kind of event where the Web rules and logic community joins the established, practically oriented business rules community (www.businessrulesforum.com). The symposium s- ports the idea that there is a successful path from high-quality research results to deployed applications.

Technics and Civilization first presented its compelling history of the machine and critical study of its effects on civilization in 1934—before television, the personal computer, and the Internet even appeared on our periphery. Drawing upon art, science, philosophy, and the history of culture, Lewis Mumford explained the origin of the machine age and traced its social results, asserting that the development of modern technology had its roots in the Middle Ages rather than the Industrial Revolution. Mumford sagely argued that it was the moral, economic, and political choices we made, not the machines that we used, that determined our then industrially driven economy. Equal parts powerful history and polemic criticism, Technics and Civilization was the first comprehensive attempt in English to portray the development of the machine age over the last thousand years—and to predict the pull the technological still holds over us today. “ The questions posed in the first paragraph of Technics and Civilization still deserve our attention, nearly three quarters of a century after they were written. ” —Journal of Technology and Culture

Prophet or messiah, the figure of Jesus serves as both the bridge and the barrier between Christianity and Islam. In this accessible and revelatory book, Muslim scholar and popular commentator Mona Siddiqui explores the theological links between the two religions, showing how Islamic thought has approached and responded to Jesus and Christological themes from its earliest days to modern times. The author finds that the philosophical overlap between the two religions is greater than previously imagined, and this being so, her book brings with it the hope of improving interfaith communication and understanding./divDIV DIVThrough a careful analysis of selected works by major Christian and Muslim theologians during the formative, medieval, and modern periods of both religions, Siddiqui focuses on themes including revelation, prophesy, salvation, redemption, grace, sin, eschatology, law, and love. How did some become the defining characteristics of one faith and not the other? Which—and why—do some translate between the two religions? With a nuanced and carefully considered analysis of critical doctrines of Christianity and Islam, the author provides a refreshing counterpoint to contemporary polemical arguments and makes an important contribution to reasoned interfaith conversation./div

This book investigates the normalisation of blame-shifting within ideological discourse as a broad feature of history, working from Churchill 's truism that history is written by the victors. To that end, it explores historical episodes of political persecution carried out under cover of moral panic, highlighting the process of ' Othering ' common to each and theorising a historical model of panic-driven scapegoating from the results. Building this model from case studies in witch panic, communist panic and terrorist panic respectively, The Oldest Trick in the Book builds an argument that features common to each case study reflect broader historical patterning consistent with Churchill 's maxim. On this basis it argues that the periodic construction of bogeymen or ' folk demons ' is a useful device for enabling the kind of victim-playing and victim-blaming critical to protecting elite privilege during periods of crisis and that in being a recurring theme historically, panic-driven scapegoating retains great ongoing value to the privileged and powerful, and thus conspicuously remains an ongoing feature of world politics.
