industries historically

largely deregulated,

recent concerns about market

collects research by a group

Moreover, government interventions may take a variety of forms, from relatively nonintrusive performance-based regulations to more aggressive antitrust and competition policies and

barriers to entry. This volume introduces the key issues surrounding economic regulation, provides an assessment of the economic effects of regulatory reforms over the past three decades, and examines how

Download Free Chapter 9 Section 4 Reforming The

Industrial World Notes
these insights bear on some of today's most significant concerns in regulatory policy.

Adolescence is a distinct, yet transient, period of development between

Download Free Chapter 9

Section 4 Reforming The

Industrial World Notes

childhood and adulthood

characterized by increased experimentation and risk-taking, a tendency to discount long-term consequences, and heightened sensitivity to peers and other social influences. A

Download Free Chapter 9

Section 4 Reforming The

Industrial World Notes

key function of adolescence is developing an integrated sense of self, including individualization, separation from parents, and personal identity. Experimentation and novelty-seeking behavior, such as

Download Free Chapter 9 Section 4 Reforming The

Industrial World Notes
alcohol and drug use, unsafe sex, and reckless driving, are thought to serve a number of adaptive functions despite their risks.

Research indicates that for most youth, the period of risky experimentation does

Download Free Chapter 9 Section 4 Reforming The

Industrial World Notes

not extend beyond adolescence, ceasing as identity becomes settled with maturity. Much adolescent involvement in criminal activity is part of the normal developmental process of identity

Download Free Chapter 9

Section 4 Reforming The

Industrial World Notes

formation and most adolescents will mature out of these tendencies.

Evidence of significant changes in brain structure and function during adolescence strongly suggests that these

Download Free Chapter 9

Section 4 Reforming The

Industrial World Notes

cognitive tendencies characteristic of adolescents are associated with biological immaturity of the brain and with an imbalance among developing brain systems. This imbalance model implies dual

Section 4 Reforming The

systems: one involved in
cognitive and behavioral
control and one involved in
socio-emotional processes.
Accordingly adolescents lack
mature capacity for self-
regulations because the
brain system that influences

Download Free Chapter 9

Section 4 Reforming The

pleasure-seeking and emotional reactivity develops more rapidly than the brain system that supports self-control. This knowledge of adolescent development has underscored important differences
