If you prefer a chewy cookie, mix the dough for only 10-15 seconds after adding the dry ingredients to the cream so the center doesn't harden ("Meet Your New Favorite Chocolate Chip Cookies!" 246). Use melted butter instead of stick butter, if you like a crispier cookie ("Meet Your New Favorite Chocolate Chip Cookies!" 248).

A New York Times Bestseller Winner of the James Beard Award for General Cooking and the IACP Cookbook of the Year Award "The one book you must have, no matter what you're planning to cook or where your skill level falls."—New York Times Book Review Ever wondered how to pan-fry a steak with a charred crust and an interior that's perfectly medium-rare from edge to edge when you cut into it? How to make homemade mac 'n' cheese that is as satisfyingly gooey and velvety-smooth as the blue box stuff, but far tastier? How to roast a succulent, moist turkey (forget about brining!)—and use a foolproof method that works every time? As Serious Eats's culinary nerd-in-residence, J. Kenji López-Alt has pondered all these questions and more. In The Food Lab, Kenji focuses on the science behind beloved American dishes, delving into the interactions between heat, energy, and molecules that create great food. Kenji shows that often, conventional methods don't work that well, and home cooks can achieve far better results using new—but simple—techniques. In hundreds of easy-to-make recipes with over 1,000 full-color images, you will find out how to make foolproof Hollandaise sauce in just two minutes, how to transform one simple tomato sauce into a half dozen dishes, how to make the crispiest, creamiest potato casserole ever conceived, and much more.

Learn the key steps of preparing any cookie, brownie, or bar! These recipes have been tested and re-tested at America's Test Kitchen, so you know you'll not only find the best recipes (both classic and modern) but also tips and techniques to help you bake the perfect cookie, any time, every time.

Winner of the 2018 James Beard Foundation Book Award (Baking and Desserts) A New York Times bestseller and named a Best Baking Book of the Year by the Atlantic, the Wall Street Journal, the Chicago Tribune, Bon Appétit, the New York Times, the Washington Post, Mother Jones, the Boston Globe, USA Today, Amazon, and more "The most groundbreaking book on baking in years. Full stop."—Saveur From One-Bowl Devil's Food Layer Cake to a flawless Cherry Pie that's crisp even on the very bottom, BraveTart is a celebration of classic American desserts. Whether down-home delights like Blueberry Muffins and Glossy Fudge Brownies or supermarket mainstays such as Vanilla Wafers and Chocolate Chip Cookie Dough Ice Cream, your favorites are all here. These meticulously tested recipes bring an award-winning pastry chef's expertise into your kitchen, along with advice on how to "mix it up" with over 200 customizable variations—in short, exactly what you'd expect from a cookbook penned by a senior editor at Serious Eats. Yet BraveTart is much more than a cookbook, as Stella Parks delves into the surprising stories of how our favorite desserts came to be, from chocolate chip cookies that predate the Tollhouse Inn to the prohibition-era origins of ice cream sodas and floats. With a foreword by The Food Lab's J. Kenji López-Alt, vintage advertisements for these historical desserts, and breathtaking photography from Penny De Los Santos, BraveTart is sure to become an American classic.

The James Beard Award–winning, bestselling author of CookWise and KitchenWise delivers a lively and fascinating guide to better baking through food science. Follow kitchen sleuth Shirley Corriher as she solves everything about why the cookie crumbles. With her years of experience from big-pot cooking at a boarding school and her classic French culinary training to her work as a research biochemist at Vanderbilt University School of Medicine, Shirley looks at all aspects of baking in a unique and exciting way. She describes useful techniques, such as brushing your puff pastry with ice water—not just brushing off the flour—to make the pastry higher, lighter, and flakier. She can help you make moist cakes; shrink-proof perfect meringues; big, crisp cream puffs; amazing pastries; and crusty, incredibly flavorful, open-textured French breads, such as baguettes. Restaurant chefs and culinary students know Shirley from their grease-splattered copies of CookWise, an encyclopedic work that has saved them from many a cooking disaster. With numerous "At-a-Glance" charts, BakeWise gives busy people information for quick problem solving. BakeWise also includes Shirley's signature "What This Recipe Shows" in every recipe. This scientific and culinary information can apply to hundreds of recipes, not just the one in which it appears. BakeWise does not have just a single source of knowledge; Shirley loves reading the works of chefs and other good cooks and shares their tips with you, too. She applies not only her expertise but that of the many artisans she admires, such as famous French pastry chefs Gaston Lenôtre and Chef Roland Mesnier, the White House pastry chef for twenty-five years; and Bruce Healy, author of Mastering the Art of French Pastry. Shirley also retrieves "lost arts" from experts of the past such as Monroe Boston Strause, the pie master of 1930s America. For one dish, she may give you techniques from three or four different chefs plus her own touch of science—"better baking through chemistry." She adds facts such as the right temperature, the right mixing speed, and the right mixing time for the absolutely most stable egg foam, so you can create a light-as-air génoise every time. Beginners can cook from BakeWise to learn exactly what they are doing and why. Experienced bakers find out why the techniques they use work and also uncover amazing pastries from the past, such as Pont Neuf (a creation of puff pastry, pâte à choux, and pastry cream) and Religieuses, adorable "little nuns" made of puff pastry filled with a satiny chocolate pastry cream and drizzled with mocha icing. Some will want it simply for the recipes—incredibly moist whipped cream pound cake made with heavy cream; flourless fruit soufflés; chocolate crinkle cookies with gooey, ludgy centers; huge popovers; famed biscuits. But this book belongs on every baker's shelf.

For all cooks, this book is a true classic. It contains hundreds of interesting recipes along with hundreds of hints will make anything you prepare a success. The owner of the Toll House Restaurant in Whitman, Massachusetts, Ruth Wakefield offers here the most famous and successful tips and recipes which made her restaurant so renowned. The author begins with the necessary information all good cooks need: helpful hints (dip peeled bananas in lemon juice to prevent discoloration, how to measure solid fat); equivalents and proportions; purchasing guide; timetable for roasting, broiling, boiling, oven steaming; care of your refrigerator and range, how to save fuel; table setting and service; challenging menus; inexpensive everyday meals; success with frozen desserts; and much, much more. There is also a "primer for brides," which contains 36 essential dishes for the new homemaker (from making hot or iced coffee to main courses, desserts, even champagne punch!) Then come the mouth-watering recipes: hors d'oeuvres (cheese balls, caviar toast, stuffed mushroom caps, etc.), appetizers (fruit shrub, stuffed cantaloupe, oyster cocktail, etc.), soups, stews, and chowders (clam bisque, baked bean soup, lobster stew, clam chowder, croutons, croustades, etc.), bread (crumb bread, shredded wheat bread, Swedish tea ring, health bread, orange bread, etc.), meats and poultry (pot roast with vegetables, Neapolitan meat loaf, shepherd's pie, crown roast of pork, chicken divan, chicken terrapin, etc.), meat substitutes (goldenrod eggs, foamy omelettes, cheese croquettes, noodle ring, etc.); seafood (baked halibut, salmon and rice delight, Toll House lobster, lobster imperial, etc.), vegetables, salads and dressing, desserts, all kinds of sauces, cakes and cookies, frosting and fillings, pastries and pies, candies, tea time sandwiches, relishes, and oddments. The book concludes with sections on solving kitchen problems, how to cook for a hundred people, and a guide to purchasing, preserving, and canning jellies, jams, fruits, and vegetables.

Winner, James Beard Foundation Award, Best Book of the Year in Baking & Desserts In this monumental new work, beloved dessert queen Alice Medrich applies her baking precision and impeccable palate to flavor flours—wheat-flour alternatives including rice flour, oat flour, corn flour, sorghum flour, teff, and more. The resulting (gluten-free!) recipes show that baking with alternate flours adds an extra dimension of flavor. Brownies made with rice flour taste even more chocolaty. Buckwheat adds complexity to a date and nut cake. Ricotta cheesecake gets bonus flavor from a chestnut flour crust; teff is used to make a chocolate layer cake that can replace any birthday cake with equally pleasing results. All of the nearly 125 recipes—including Double Oatmeal Cookies, Buckwheat Gingerbread, Chocolate Chestnut Soufflé Cake, and Blueberry Corn Flour Cobbler—take the flavors of our favorite desserts to the next level. The book is organized by flour, with useful information on its taste, flavor affinities, and more. And because flavor flours don't react in recipes the same way as wheat flour, Medrich explains her innovative new techniques with the clarity and detail she is known for.

"25 edible science experiments that teach kids that cooking is chemistry"--

Imagine a world without chocolate chip cookies! In this middle grade book and workbook, kids learn critical thinking through cookies. As Cookie Detectives they journey through time and space to trace all the events and turning points that led to the chocolate chip cookie's invention. Then, they embark on project-based learning to plan a chocolate chip cookie business or bakesale. The Cookie Detectives become Cookie Entrepreneurs, reading stories, analyzing facts, thinking about legends and building curiosity. They will see the benefits of risk taking and innovation, perseverance and how all the lessons they learn in school relate to the real world. The Chocolate Chip Cookie School makes a great book for a unit, home school, and unschool learning experiences which kids can read and collaborate on as a project-based learning group or by themselves. Printable exercises and worksheets will help using the book for fun lessons.While the book includes a couple of recipes and details about the chemistry and costs of cookie making, in the end, kids will appreciate ALL the food they eat and think deeply and appreciate not only food but everything they consume. The best part is kids will come to these conclusions by themselves as they wear their Cookie Detective hats.

Presents a variety of science projects on the topic of chemistry and offers tips on project presentation.

Joy the Baker Cookbook includes everything from "Man Bail" Apple Crisp to Single Lady Pancakes to Peanut Butter Birthday Cake. Joy's philosophy is that everyone loves dessert; most people are just looking for an excuse to eat cake for breakfast.
