Cloud Busting really brought up my thoughts on friendship. In some ways, the book was quite strange [due to the poetry] but in other ways it made me think quite hard. Mostly though, this book is absolutely magnificent but it's only short. Written by Oska, age 10 The book is about a boy called Sam and another boy called Davey. Sam can't stand Davey until they become friends. I think the book ...

"Cloudbusting" ...was inspired by a book that I first found on a shelf... It was just calling me from the shelf, and when I read it I was very moved by the magic of it. It's about a special relationship between a young son and his father. The book was written from a child's point of view. His father is everything to him; he is the magic in his life, and he teaches him everything, teaching him to be open-minded and not to build up barriers' - Kate Bush This famous book, the inspiration behind Kate Bush's 1985 hit song 'Cloudbusting', is the extraordinary account of life as friend, confidant and child of the brilliant but persecuted Austrian psychoanalyst Wilhelm Reich. Peter, his son, shared with his father the revolutionary concept of a world where dream and reality are

virtually indistinguishable, and the sense of mission which set him and his followers apart from the rest of the human race. Here, Peter Reich writes vividly and movingly of the mysterious experiences he shared with his father: of flying saucers; the 'cloudbuster' rain-makers and the FDA narks; and of the final tragic realization of his father's death, which woke him up to the necessity of living out his life in an alien world. Already regarded as a modern classic, *A Book of Dreams* is not only a beautifully written narrative of a remarkable friendship and collaboration, but a loving son's heartfelt tribute to a loving father. dynamic subjects to photograph is the human body, especially when it is in motion. Though it has all been done before, I still have the desire to draw on some variation, however slight, which allows the creation of a beautiful and original image. By using flour for the dance series showcased in *Cloud Busting*, these particles add a new and interesting layer and an important dimension to the series. Most of the images are captured while the powder is in a form that only exists for a fraction of a second before the illusion is no longer valid. This is a wonderful metaphor for beauty and even life itself."

May's mother dies suddenly, she and her brother Billy are taken in by Aunty. However, their loss leaves them both searching for their place in a world that doesn't seem to want them. While Billy takes his own destructive path, May sets out to find her father and her Aboriginal identity. Her journey leads her from the Australian east coast to the far north, but it is the people she meets, not the destinations, that teach her what it is to belong. *Swallow the Air* is an unforgettable story of living in a torn world and finding the thread to help sew it back together.

An exploration of artworks that use weather or atmosphere as the primary medium, creating new coalitions of collective engagement with the climate crisis. In a time of climate crisis, a growing number of artists use weather or atmosphere as an artistic medium, collaborating with scientists, local communities, and climate activists. Their work mediates scientific modes of knowing and experiential knowledge of weather, probing collective anxieties and raising urgent ecological questions, oscillating between the “big picture systems view” and a ground-based perspective. In this book,

Janine Randerson explores a series of meteorological art projects from the 1960s to the present that draw on sources ranging from dynamic, technological, and physical systems to indigenous cosmology. Randerson finds a precursor to today's meteorological art in 1960s artworks that were weather-driven and infused with the new sciences of chaos and indeterminacy, and she examines work from this period by artists including Hans Haacke, Fujiko Nakaya, and Aotearoa-New Zealand kinetic sculptor Len Lye. She looks at live experiences of weather in art, in particular Fluxus performance and contemporary art that makes use of meteorological data streams and software. She describes the use of meteorological instruments, including remote satellite sensors, to create affective atmospheres; online projects and participatory performances that create a new form of “social meteorology”; works that respond directly to

climate change, many from the Global South; artist-activists who engage with the earth's diminishing cryosphere; and a speculative art in the form of quasi-scientific experiments. Art's current eddies of activity around the weather, Randerson writes, perturb the scientific hold on facts and offer questions of value in their place.
