Comparative Psychology - Study.com

Comparative psychology, the study of similarities and differences in behavioral organization among living beings, from bacteria to plants to humans. The discipline pays particular attention to the psychological nature of human beings in comparison with other animals.

Comparative psychology | Britannica

Comparative psychology refers to the scientific study of the behavior and mental processes of non-human animals, especially as these relate to the phylogenetic history, adaptive significance, and development of behavior. Research in this area addresses many different issues, uses many different methods and explores the behavior of many different species from insects to primates. Comparative psychology is sometimes assumed to emphasize cross-species comparisons, including those between humans and

Comparative and Psychological Study on Meditation, by M ...

Comparative research essentially compares two groups in an attempt to draw a conclusion about them. Researchers attempt to identify and analyze similarities and differences between groups, and these studies are most often cross-national, comparing two separate people groups.

Featuring animal research, from pigeons to primates, this book explains how comparative psychology can enrich our insights into human psychological processes. Each chapter covers a different clinical disorder or problem commonly encountered by clinical psychologists and therapists, including depression, autism and social communication disorders, substance abuse and obesity, and reviews related research into animal behaviors. Revealing how animal models can grant psychologists a better understanding of the motivations and causes for behaviors that are impossible or challenging to study in humans, the authors suggest interventions, drawn from research findings in comparative psychology, that can effectively address psychological disorders in humans.

The first comparative account of West African psychological beliefs regarding the soul, and the spiritual powers of man and animals.

This textbook introduces the student to evolutionary and developmental approaches to the study of animal behavior. It can be used as a core textbook for senior undergraduate and graduate courses in Comparative Psychology, Animal Behavior, and Evolutionary Psychology.

This book introduces cognitive processes and animal behaviour across species, integrating classic studies and contemporary research in psychology, biology and neuroscience.

Modern psychology is at an impasse as it searches anxiously for new therapies to address the increasing occurrence of mental illness in contemporary society. In this groundbreaking anthology, leading authors from the perennialist school, including Huston Smith, Seyyed Hossein Nasr, and Frithjof Schuon, draw on the age-old insights of the world's wisdom traditions to argue that modern psychology—behaviorism, psychoanalysis, humanistic and transpersonal psychology—overlooks the specifically spiritual factors contributing to mental health and illness.

Take a journey through one of the most costly psychiatric disorders: Conduct Disorder. Explore why children in the same environment as a child with conduct disorder are more affected than the child diagnosed with the problem. Delve into the reasons most practicing clinicians of conduct disorder are influenced more so by the persons they treat and their desire to refine theoretical understanding of others and improve their methods of helping than by empirical research. With the increasing need to effectively address conduct-disordered youth, this book offers a comparative analysis of eight distinctive theoretical and practical interventions by expert therapists of one case study of conduct-disordered youth. Coverage of each treatment includes: Overview of the model Establishment of treatment goals Discussion of assessment procedures Specific clinical interventions In addition, a comparison grid offers a summation and comparison of the eight treatment models for use in developing and enhancing patient-tailored treatment approaches.
