Contract Law: A Case & Problem-Based Approach is a unique casebook that provides an organizational structure introducing students to each major area of contract law before exploring these areas in greater depth later in the casebook. Specifically, the casebook is broken into three major parts, each of which is designed not only to orient the students to the major subject areas of contract law but also meant to help them appreciate the connections and relationships between and among these various subject areas. Part I, the “30,000-foot view,” familiarizes students with contract law, discusses the sorts of problems with which contract law is concerned, and introduces them to some of the basic rules and theories governing contract law. Part II, the “10,000-foot view,” exposes students to each major substantive area of contract law in more depth by discussing one classic case in each area, along with additional historical, theoretical, and contextual materials to supplement the black-letter doctrine. After finishing Parts I and II, the student will have a basic understanding of each major area of contract law, along with a good understanding of how these parts fit together. Part III is therefore designed to explore each of the major subject areas in greater depth, and is organized along the lines of a traditional contracts casebook, including a healthy mix of classic and modern cases, short problems, and exercises. New to the Second Edition: Additional materials and cases added to explore the contract doctrines of impossibility and impracticability in light of past and current epidemics (in the case of polio) and pandemics (in the case of COVID-19). Additional case added to explore the relationship between Contract Law, Civil Rights, and Constitutional Law. Reorganization of some materials in Chapter 8 (defenses). More focused notes and appendices Professors and student will benefit from: Organization exposes students to main concepts, and gives professors a number of choices about how to teach their course. Helpful doctrinal introductions to each new major substantive section. Historical, theoretical, and comparative materials are presented to help students understand and think critically about the black-letter rules. “Thinking tools” feature that helps the student think critically about the law, along with theoretical, historical, doctrinal, contextual, and practice-oriented notes enrich the students’ black-letter experience. Enjoyable, contextual materials that are included after a number of classic cases help to bring to light fascinating background information.

While the first editionwas limited to a comparative analysis of the rules on formation and validity of contracts, agency, third party beneficiaries, and assignment, the second edition now also includes contractual remedies and various updates and revisions of the first edition, especially in the light of the recentchanges to the French Code civil. Furthermore, the book comprises a wealth of translated extracts of legislation, cases, and academic literature, comprehensively covering all aspects of contract law. Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the law of contracts in Israel covers every aspect of the subject - definition and classification of contracts, contractual liability, relation to the law of property, good faith, burden of proof, defects, penalty clauses, arbitration clauses, remedies in case of non-performance, damages, power of attorney, and much more. Lawyers who handle transnational contracts will appreciate the explanation of fundamental differences in terminology, application, and procedure from one legal system to another, as well as the international aspects of contract law. Throughout the book, the treatment emphasizes drafting considerations. An introduction in which contracts are defined and contrasted to torts, quasi-contracts, and property is followed by a discussion of the concepts of 'consideration' or 'cause' and other underlying principles of the formation of contract. Subsequent chapters cover the doctrines of 'relative effect', termination of contract, and remedies for non-performance. The second part of the book, recognizing the need to categorize an agreement as a specific contract in order to determine the rules which apply to it, describes the nature of agency, sale, lease, building contracts, and other types of contract. Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Israel will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative contract law.
