For anyone who's ever dreamed of ruling over their own empire, here's your chance! Micronations are imaginary countries that have a lot of the same things as real ones: laws, customs, history, and their own flags, coins, and postage stamps. Micronations: Invent Your Own Country and Culture takes readers step-by-step to create their own unique realm, using examples from real nations, micronations, and fictional lands. What makes a country a country? What symbols and systems define a country and help it function? Learn about geography and government, technology and the environment, art and culture, and the literary device of "world-building" used in works like The Hobbit and Harry Potter. Kids get to invent their own language, music, games, clothing, food, and holidays to fit their micronation's tradition. Whether they create a land of time travel where every city exists in a different epoch or an underwater monarchy whose chief export is fish, Micronations: Invent Your Own Country and Culture will engage kids' imagination and teach make-believe rulers how the real world works. This title meets Common Core State Standards for literacy in language arts, history and social studies; Guided Reading Levels and Lexile measurements indicate grade level and text complexity.

Tired of following other people's rules? Think you can do better? Now's your chance! This innovative and fun new title from Lonely Planet Kids shows you how to design a completely new nation from scratch. Decide on the laws, choose your borders, make your flag, attract loyal citizens and lots more. For rulers aged 8 years and up.

A tiny American town's plans for radical self-government overlooked one hairy detail: no one told the bears. Once upon a time, a group of libertarians got together and hatched the Free Town Project, a plan to take over an American town and completely eliminate its government. In 2004, they set their sights on Grafton, NH, a barely populated settlement with one paved road. When they descended on Grafton, public funding for pretty much everything shrank: the fire department, the library, the schoolhouse. State and federal laws became meek suggestions, scarcely heard in the town's thick wilderness. The anything-goes atmosphere soon caught the attention of Grafton's neighbors: the bears. Freedom-loving citizens ignored hunting laws and regulations on food disposal. They built a tent city in an effort to get off the grid. The bears smelled food and opportunity. A Libertarian Walks Into a Bear is the sometimes funny, sometimes terrifying tale of what happens when a government disappears into the woods. Complete with gunplay, adventure, and backstabbing politicians, this is the ultimate story of a quintessential American experiment -- to live free or die, perhaps from a bear.

An international business expert helps you understand and navigate cultural differences in this insightful and practical guide, perfect for both your work and personal life. Americans precede anything negative with three nice comments; French, Dutch, Israelis, and Germans get straight to the point; Latin Americans and Asians are steeped in hierarchy; Scandinavians think the best boss is just one of the crowd. It's no surprise that when they try and talk to each other, chaos breaks out. In The Culture Map, INSEAD professor Erin Meyer is your guide through this subtle, sometimes treacherous terrain in which people from starkly different backgrounds are expected to work harmoniously together. She provides a field-tested model for decoding how cultural differences impact international business, and combines a smart analytical framework with practical, actionable advice.
