~~[2010 valeria nagy curbside consultation in oculoplastics 49 clinical questions](#)~~ provides information basic enough for residents while also incorporating expert pearls that even high volume ophthalmologists will appreciate residents fellows and practicing physicians alike will benefit from the user friendly and casual format and the expert.

Are you looking for concise, practical answers to those questions that are often left unanswered by traditional texts and references in oculoplastics? Are you seeking brief, evidence-based advice for common clinical dilemmas or complications? Curbside Consultation in Oculoplastics: 49 Clinical Questions provides quick and direct answers to the thorny questions most commonly posed during a “curbside consultation” between experienced clinicians. Dr. Robert C. Kersten and Dr. Timothy J. McCulley, have designed this unique reference in which oculoplastic specialists offer expert advice, preferences, and opinions on tough clinical questions commonly associated with oculoplastics. The unique Q&A format provides quick access to current information related to oculoplastics with the simplicity of a conversation between two colleagues. Images, diagrams, and references are included to enhance the text and to illustrate common clinical dilemmas. Curbside Consultation in Oculoplastics: 49 Clinical Questions provides information basic enough for residents while also incorporating expert pearls that even high-volume ophthalmologists will appreciate. Residents, fellows, and practicing physicians alike will benefit from the user-friendly and casual format and the expert advice contained within. Some of the questions that are answered: • What do I do when a patient on anti-coagulants needs surgery? • When does an eyelid lesion need to be biopsied? • What are the general treatment guidelines for Graves' ophthalmopathy? • How should I treat bacterial orbital cellulitis? • How do you distinguish an orbital infection from sterile inflammation? • When should I be concerned about systemic disease in a patient with blepharoptosis? • What are the oculoplastic uses of botulinum toxin? • How do I know when to order an MRI or a CT?

Curbside Consultation in Oculoplastics: 49 Clinical Questions is unique Q&A format that provides quick access to current information related to oculoplastics with the simplicity of a conversation between two colleagues.

Are you looking for concise, practical answers to those questions that are often left unanswered by traditional references on uveitis? Are you seeking brief, evidence-based advice for the daily examination of patients? Curbside Consultation in Uveitis: 49 Clinical Questions provides quick and direct answers to the thorny questions most commonly posed during a “curbside consultation” between experienced clinicians. Dr. Stephen Foster has designed this unique reference in which uveitis specialists offer expert advice, preferences, and opinions on tough clinical questions commonly encountered by ophthalmologists, residents, and other health care professionals. The unique Q&A format provides quick access to current information related to uveitis with the simplicity of a conversation between two colleagues. Images, diagrams, and references are included to enhance the text and to illustrate clinical diagnoses and treatment plans. Curbside Consultation in Uveitis: 49 Clinical Questions provides information basic enough for residents while also incorporating expert pearls that even high-volume ophthalmologists and specialists will appreciate. Optometrists, ophthalmologists, ophthalmologists-in-training, and even retina specialists will benefit from the user-friendly and casual format and the expert advice contained within. Some of the questions that are answered: • How do the results of the Systemic Immunosuppressive Therapy for Eye Disease (SITE) Cohort Study apply to the care of my patients with uveitis? • How should I evaluate and treat a patient with uveitis? • How should I treat macular edema in a patient with uveitis? • How should I treat a pregnant woman with macular threatening toxoplasmosis retinochoroiditis? • When should I refer a patient with uveitis to a uveitis specialist?

Are you looking for concise, practical answers to those questions that are often left unanswered by traditional references of the retina? Are you seeking brief, evidence-based advice for the daily examination of patients? Curbside Consultation in Retina: 49 Clinical Questions provides quick and direct answers to questions most commonly posed during a “curbside consultation” between experienced clinicians. Dr. Sharon Fekrat, along with co-editors Drs. Darius Moshfeghi and Dean Elliott, have designed this unique reference that offers expert advice, preferences, and opinions on a variety of clinical questions commonly associated with the retina. The unique Q&A format provides quick access to current information related to the retina with the simplicity of a conversation between two colleagues. Images and references are included to enhance the text and to illustrate clinical diagnoses. Curbside Consultation in Retina: 49 Clinical Questions provides information basic enough for residents while also incorporating expert pearls that even high-volume ophthalmologists and specialists will appreciate. Optometrists, ophthalmologists, ophthalmologists-in-training, and even retina specialists will benefit from the user-friendly and casual format and the expert advice contained within. Some of the questions that are answered: • What is the treatment paradigm for postop CME? • How do I follow a patient who is pregnant and also has diabetes? • How should I counsel my patients with dry AMD and what-about various vitamin supplements? • What systemic medications require periodic fundus evaluation, what do I look for and what tests do I do? • How can I differentiate all of those white dot syndromes?

A best-seller for two decades, the well respected and widely used Manual of Oculoplastic Surgery by Dr. Mark R. Levine has been updated and revised into a much anticipated Fourth Edition. Manual of Oculoplastic Surgery is designed to guide the physician to explore and complete a variety of ocular plastic procedures in a comprehensive and logical step-by-step sequence. Some sections inside include: * Trauma * Cosmetic * Congenital Ptosis * Acquired Ptosis * Eyelid Malpositions * Facial Nerve Dysfunction * Eyelid Flaps * Orbital Surgery Each procedure includes a review of the surgical anatomy, step-by-step instructions, and accompanying illustrations--over 500 throughout the text! New topics covered include: * Sinus surgery * Face fillers * Endoscopic dacryocystorhinostomy * Midface lift * Asian bletharoplasty * Naugle-Levine lid reconstruction procedure The Manual of Oculoplastic Surgery is a classic text and a must have resource for ophthalmologists, oculofacial plastic fellows, residents, ENT-facial plastic surgeons, and general plastic surgeons.

The first edition of this text offers guidance and advice on the diagnosis and management of the complete spectrum of ophthalmic tumors, including the eyelid, conjunctival, intraocular, and orbital tumors. The editors are joined by over 120 international contributors to present a broad perspective from a multidisciplinary team that will offer a diverse and balanced view of ophthalmic oncology clinical practice. This is a comprehensive book that includes over 100 chapters, organized into 7 sections that provide a wealth of information for the management of patients with ophthalmic tumors from examination techniques to classification to surgical techniques.

Cornea and Refractive Atlas of Clinical Wisdom, edited by Dr. Samir A. Melki and Dr. Mark A. Fava, gathers unique observations that experienced eye surgeons have learned in their daily treatment of patients. Each chapter begins with a detailed description of the condition from diagnosis to symptoms to complications to eventual treatment methods. Features Include: * Practical tips, as opposed to the theoretical aspects of the disease. * Diagnostic and medical management of the disease. * Anecdotal experience that has been proven correct over the years vs. the type of information that is awaited for from a large clinical trial. * Full color images reinforce the information presented in the book. Cornea and Refractive Atlas of Clinical Wisdom also includes a condensed summary of diagnostic pearls acquired through the years from personal experience with a focus on diagnosis and medical management. Some Topics Include: * Imaging and diagnostics: o IOL Power, corneal topography * Ocular surface disorders: o Ocular chemical injury, dry eye syndrome * Infectious disease: o Fungal keratitis, epidemic keratoconjunctivitis * Inflammatory Diseases: o Scleritis, Stevens-Johnson syndrome * Neoplasia and epithelial downgrowth: o Melanocytic lesions of the ocular surface * Dystrophies and degeneration: o Keratoconus, corneal transplant rejection * Refractive Surgery: o LASIK flap folds, corneal ectasia after LASIK All ophthalmologists, regardless of level of experience, will have an interest in the clinical diagnosis and medical management information gathered inside the pages of Cornea and Refractive Atlas of Clinical Wisdom.

This text is for anyone interested in the use of Botox and dermal filler agents for a wide variety of functional and minimally invasive facial rejuvenation procedures. The storage, reconstitution, and mechanism of action of botulinum toxin or Botox are all thoroughly explained. A thorough analysis is provided detailing the underlying facial muscle anatomy that is required and how physicians can integrate this procedure into their current practice. An additional section is also included detailing injectable filler agents, a more effective form of treatment for lines that are present at rest. As the demand for less invasive facial rejuvenation products and treatments continue to increase, Botox injections are emerging as the popular choice. While the initial public reaction was guarded, the procedure is now common, as millions of individuals around the world are pursuing the cosmetic application of Botox for wrinkle reduction. The text utilizes a "how to" approach in teaching the ways Botox can remedy many functional disorders and conditions.

Are you looking for concise, practical answers to those questions that are often left unanswered by traditional texts and references in neuro-ophthalmology? Are you seeking brief, evidence-based advice for common clinical dilemmas or complications?Curbside Consultation in Neuro-Ophthalmology: 49 Clinical Questions provides quick and direct answers to the thorny questions most commonly posed during a “curbside consultation” between neuro-ophthalmologists.
