Rapid population

Acces PDF Decentralised Waste Management In Indian Railways

growth, high standards of living, and technological development are constantly increasing the diversity and quantity of solid waste. The production of solid municipal waste associated with the high

Acces PDF Decentralised

Waste proportion of
organic waste
Management In
Indian Railways
and its improper
disposal lead to
considerable
environmental
pollution due to
the emission of
greenhouse gases
such as methane,
carbon dioxide,
etc. In such a
challenging
environment,

Acces PDF Decentralised Waste Management in Indian Railways

municipal
authorities need
to develop more
effective

solutions to
manage the
growing urban
solid waste.

Most of the
municipal solid
waste mainly
constitutes
degradable
materials, which

Acces PDF Decentralised

represent a significant role in greenhouse gas emissions in urban localities.

Integrated solid waste management approaches must be developed and improved to manage the increasing organic

Access PDF
Decentralised
fractions of
municipal solid
waste, which
helps to reduce
greenhouse
emissions with
potential
economic
benefits. A
sustainable
management of
municipal solid
waste systems
constitutes a

Acces PDF

Decentralised

Waste Management in Indian Railways

promising and attractive trend to study current consumption behaviors responsible for waste generation, and to protect the global ecosystem. This book presents the management of municipal of

Acces PDF Decentralised Waste waste, including Management In recycling and Indian Railways landfill

technologies.

Moreover,
composition and
types of waste
will be
investigated. As
a result, the
most appropriate
and feasible
scenarios for

Acces PDF

Decentralised

Waste Management In Indian Railways

the management of municipal solid waste are presented to provide the respected readership with the scientific background for sustainable development in these processes, which are increasingly

Indian Railways

garbage still
disposed of in
unlined
landfills, is at
a point of
crisis. With
waste generation
far outpacing
processing
capacity, cities
know they must
invest in
"improving"
waste management

Acces PDF

Decentralised

Waste Management in Indian Railways

systems, yet a key question is whether to invest in centralized or decentralized, formal or informal waste systems, or combine the strengths of both. This research asks what approach to

Acces PDF

Decentralised

Waste management

in India will

increase

stability,

economic and
environmental
sustainability,
and social
benefit. To
answer those
questions, I
conducted a case
study of Pune,
since the city

Access PDF Decentralised Waste Management In Indian Railways

has implemented centralized waste processing, followed by supporting informal sector collection and instituting decentralized collection. The diversity of its methods and the many challenges

Acces PDF

Decentralised

Waste Management in Indian Railways

Pune has faced
have allowed me
to analyze the
benefits,
impacts and
limitations of
each of these
approaches. For
the case study,
I conducted more
than 50
interviews of
city staff,
waste pickers,

Acces PDF Decentralised Waste picker cooperative staff, restaurant Management In Indian Railways

managers, and
citizens. Based
on this
analysis, and
comparison to
other Indian
cities,
including Delhi
and Bangalore, I
have concluded

Acces PDF Decentralised Waste Management In Indian Railways

that the best solution for most Indian cities is to build the capacity of the informal sector while also creating decentralized processing infrastructure to handle organics and non-

Acces PDF Decentralised

recyclable

waste. While
this approach is
challenging, it
is possible, and
I have created a
set of
recommendations
in order to
implement this
effectively.

These guidelines
include the
following: 1)

Acces PDF Decentralised Waste Management In Indian Railways

conduct long-term planning across city departments to have proactive approach to waste generation; 2) focus on waste reduction and eliminate most non-recyclable and non-biodegradable

Acces PDF

Decentralised

Waste streams;

Management in

Indian Railways

3) invest in the capacities of the informal sector, including giving waste pickers space for sorting, more information on their rights, and support; 4) build decentralized

Acces PDF

Decentralised

waste processing systems for organics and non-recyclables that create benefits for and minimize impacts on host communities; and 5) site all facilities more equitably by building community consensus.
