OUR CULTURE HAS BECOME OBSESSED WITH HUSTLING. As we struggle to keep up in a knowledge economy that never sleeps, we arm ourselves with life hacks, to-do lists, and an inbox-zero mentality, grasping at anything that will help us work faster, push harder, and produce more. There's just one problem: most of these solutions are making

things worse. Creativity isn't produced on an assembly line, and endless hustle is ruining our mental and physical health while subtracting from our creative performance. Productivity and Creativity are not compatible; we are stuck between them, and like the opposite poles of a magnet, they are tearing us apart. When we're told to sleep more, meditate, and slow down, we nod our heads in agreement, yet seem incapable of applying this advice in our own lives. Why do we act against our creative best interests? WE HAVE FORGOTTEN HOW TO FLOAT. The answer lies in our history, culture, and biology. Instead of focusing on how we work, we must understand why we work—why we believe that what we do determines who we are. Hustle and Float explores how our work culture creates contradictions between

A look at the German High Command during World War II challenges the myth that the German Generals could have won the war had Hitler not interfered, and maps out the history and the personalities of the German Command Structure.

These exercises should be transposed to all twelve (12) tones, so we can achieve perfect coordination. Micro-Hydro Design Manual has grown from Intermediate

Technology's field experiences with micro-hydro installations and covers operation and maintenance, commissioning, electrical power, induction generators, electronic controllers, management, and energy surveys. There is an increasing need in many countries for power supplies to rural areas, partly to support industries, and partly to provide illumination at night. Government authorities are faced with the very high costs of extending electricity grids. Often micro-hydro provides an economic alternative to the grid. This is because independent micro-hydro schemes save on the cost of grid transmission lines, and because grid extension schemes often have very expensive equipment and staff costs. In contrast, micro-hydro schemes can be designed and built by local staff and smaller organizations following less strict

Already a much loved classic in Austria, "Tante Jolesch or the Decline of the West in Anecdotes" is Friedrich Torberg's tribute to the Jewish coffee-house world that flourished in Vienna in the afterglow of the Austro-Hungarian Empire until its final collapse in 1938. Based on Torberg's personal memories of intellectuals and eccentrics of the time, including Egon Friedell, Fritz Grünbaum, Egon Erwin Kisch, Alfred Polgar, and Franz Werfel, this work evokes the storytelling and humour prominent among Vienna's coffee-house denizens. These anecdotes allow one to see into the lives of assimilated Jews before the Shoah, beginning in the living

room of Tante Jolesch, revolving around the coffee-house, and extending to summer resorts, sports matches, dinner parties, a psychiatric clinic under the care of Sigmund Freud, and the office of a U.S. consular official in charge of granting visas to the United States. In this volume, Torberg builds a literary monument to a group of people, a time, and a culture of which he saw himself as one of the last representatives. Despite being one of the most prominent Austrian literary figures of the twentieth century, Friedrich Torberg is not well known in the English-speaking world. He joined the literary elite of pre-war Austria at the age of twenty-two, but his career was cut short by the Nazi ban on Jewish writers. Invited by the New York PEN Club as one of "ten outstanding German anti-Nazi writers", Torberg was able to flee to the
