The Territorial Review of Istanbul analyses the enormous changes over the past century undergone in Istanbul, and the challenges that it faces for the future.

Marketing and Managing Tourism Destinations is a comprehensive and integrated introductory textbook covering both destination marketing and destination management in one volume. It focuses on how destination management is planned, implemented and evaluated as well as the management and operations of destination management organizations (DMOs), how they conduct business, major opportunities, challenges and issues they face to compete for the global leisure and business travel markets. This second edition has been updated to include:

- A new chapter on

this book contains additional research papers submitted for a meeting on sustainable development and planning organized in 2011 by the Wessex Institute of Technology (WIT). WIT has a long and very successful record of organizing conferences on the topic of sustainability, which requires an interdisciplinary approach. Any sustainable solutions that are derived solely from the perspective of a single discipline may have unintended damaging consequences that create new problems. Thus effective sustainable solutions require the collaboration of scientists and engineers from various disciplines, as well as planners, architects, environmentalists, policy makers, and economists. These experts must not only communicate with each other effectively, but also understand the social aspects of the problem at hand. The contents of the

book reflect that interdisciplinary approach. The topics covered by the papers in the book include: City Planning, Regional Planning; Social and Political Issues; Sustainability in the Built Environment; Rural Development; Cultural Heritage; Transportation; Ecosystems Analysis; Protection and Remediation; Environmental Management; Environmental Impact Assessment; Indicators of Sustainability; Sustainable Solutions in Developing Countries; Sustainable Tourism ; Waste Management; Flood Risk Management; Resources Management; Industrial Developments.

This book revisits Erich Auerbach's Istanbul writings as pioneering works of contemporary literary history and cultural

criticism. It interprets these writings, which center around Western literary cultures, against the background of Auerbach's Turkish colleagues' works that trace Middle Eastern and South Asian cultural histories.

GIS is used today to better understand and solve urban problems. GIS in Sustainable Urban Planning and Management: A Global Perspective, explores and illustrates the capacity that geo-information and GIS have to inform practitioners and other participants in the processes of the planning and

management of urban regions. The first part of the book addresses the concept of sustainable urban development, its different frameworks, the many ways of measuring sustainability, and its value in the urban policy arena. The second part discusses how urban planning can shape our cities, examines various spatial configurations of cities, the spread of activities, and the demands placed on different functions to achieve strategic objective. It further focuses on the recognition that urban dwellers are increasingly under threat from natural hazards and climate change. Written by authors with expertise on the applications of geo-information in urban management, this book showcases the importance of GIS in better understanding current urban challenges and provides new insights on how to apply GIS in urban planning.

It illustrates through real world cases the use of GIS in analyzing and evaluating the position of disadvantaged groups and areas in cities and provides clear examples of applied GIS in urban sustainability and urban resilience. The idea of sustainable development is still very much central in the new development agenda of the United Nations, and in that sense, it is of particular importance for students from both the Global South and Global North. Professionals, researchers, and students alike will find this book to be an invaluable resource for understanding and solving problems relating to sustainable urban planning and management.

Destination marketing is more challenging than other goods and services. The basis of competitive advantage shifts from tourism resources only (destination marketing) to a location-based or city-wide integrated management (place marketing). In this book, tourism scholars Metin Kozak and Seyhmus Baloglu discuss and synthesize theories, models, techniques, and principles for strategic marketing and management of tourist destinations, and demonstrate ways in which to further develop the concept of destination competitiveness for application within these destinations. The authors highlight the need for managing brand equity, tourist experience, and information systems, as well as involving internal and external stakeholders in strategic planning and implementation. This book offers practical information directly related to the tourism

industry, using the examples of real-world cases to bridge marketing theory with practice. With its international focus and applications for developing a competitive advantage in today's global marketplace, this research will be indispensable to students and scholars of tourism, hospitality, and leisure and recreation programs, as well as practitioners within these industries.

This book examines Turkish-Qatari relations from the nineteenth century to the present. The authors argue that conducive structural dynamics and ambitious geopolitical goals facilitated critical foreign policy convergences between Ankara and Doha, eventually developing into a strategic partnership between the two countries.

This book provides a demographic profile of the Syrian diaspora into Europe and identifies the issue of forced migration as a separate and increasingly salient topic within the more general field of migration research. It describes the progressive increase in numbers of Syrian refugees in different European countries during recent years and gives a demographic profile of the Syrian refugee population. The book also compares and synthesizes the demographic profiles presented, to show how the population of Syrian refugees differs from country to country in terms of age structure, sex ratio, family status, educational attainment and other social and economic characteristics. By providing a solid empirical portrait based on national and international

statistics, this book will be a great resource to students, academics in migration and refugee studies as well as social scientists and policy-makers in European countries.

This book shows the remarkable diversification in Turkey's international political economy landscape in the 2000s: its domestic political-economy framework, instrumental alternatives and geographic outreach. It assesses both how an emerging economy like Turkey copes with domestic and external challenges and the question of how substantial Turkey's recent rise in global politics really is. The volume also explains Turkey's economic growth and political transformation in line with the changes occurring in world economics, from the Washington Consensus era to the

current “mix” or “hybrid” era encompassing both the characteristics of the Post-Washington and Beijing Consensus eras. The contributors portray the complexity of Turkish politics and its fragilities at the political economy level.
