This study is an account of the life and work of the 15th-century Flemish master, Petrus Christus. It offers an examination of the physical characteristics of his paintings, and also places the artist in the context of the city of Bruges, where he lived and worked.

This book is intended for researchers and postgraduates who are interested in the consensus reaching process in group decision-making problems. It puts forward new optimization-based decision support approaches to help decision-makers find roadmaps to consensus with minimum adjustments. Simulation experiments and comparison analysis are subsequently conducted to assess the validity of the proposal. After reading this book, readers will possess a number of valuable tools for building consensus with minimum adjustments in the context of group decision-making. Further, the proposed approach can effectively reduce costs in consensus building.

Korean: A Comprehensive Grammar is a reference to Korean grammar, and presents a thorough overview of the language, concentrating on the real patterns of use in modern Korean. The book moves from the alphabet and pronunciation through morphology and word classes to a detailed analysis of sentence structures and semantic features such as aspect, tense, speech styles and negation. Updated and revised, this new edition includes lively descriptions of Korean grammar, taking into account the latest research in Korean linguistics. More lower-frequency grammar patterns have been added, and extra examples have been included throughout the text. The unrivalled depth and range of this updated edition of Korean: A Comprehensive Grammar makes it an essential reference source on the Korean language.

The New York Times bestselling Cackleberry Club series returns with three intrepid ladies who know their way around a kitchen—as well as a crime scene... Petra, Suzanne, and Toni may have lost their husbands, but they've found new life operating the Cackleberry Club café. It's where the locals head for an amazing breakfast, the good company of friends, and a puzzling mystery or two... THIS KILLER IS TOAST Suzanne and Toni are off to Memorial Cemetery to help prepare for its 150th anniversary celebration. The ladies expect to find the historical society's tent, but instead they discover the body of ex-prison warden Lester Drummond lying facedown in a freshly dug grave. Now, with the town peppered with suspects and the local authorities in over their heads, it's up to the Cackleberry Club to unscramble the clues and sniff out a bad egg. Recipes included!

Some girls have all the luck. So far, Carrie Fitzgerald's sixteen years have been pretty sweet. Straight A's, an adorable boyfriend, a starting position on the varsity basketball team... But Carrie's luck is about to, well, change. Suddenly, her boyfriend dumps her (to "hang out with his friends"!), she and her best friend have a massive blowout, and she gets a D on a biology test. Carrie knows what's wrong -- her mom accidentally donated her lucky T-shirt to Help India. That one adorable, perfect T-shirt was the source of all her good fortune. So Carrie does what any girl would do: She's going to India. Cross your fingers and hope that Carrie finds adventure, love, and maybe just a little good luck along the way....

Arduino is an open source electronics prototyping platform for building a multitude of smart devices and gadgets. Developers can benefit from using Arduino in their projects because of the ease of coding, allowing you to build cool and amazing devices supported by numerous hardware resources such as shields in no time at all. Whether you're a seasoned developer or brand new to Arduino, this book will provide you with the knowledge and skill to build amazing smart electronic devices and gadgets. First, you will learn how to build a sound effects generator using recorded audio-wave files you've made or obtained from the Internet. Next, you will build DC motor controllers operated by a web page, a slide switch, or a touch sensor. Finally, the book will explain how to build an electronic operating status display for an FM radio circuit using Arduino.

"Much research has been conducted to provide researchers and hearing healthcare professionals with updated information in regard to hearing assessments, results interpretation and case management. This ongoing research is particularly imperative to guide clinicians with optimized methods in assessing and managing pediatric patients with hearing impairment and disability. As such, tremendous research efforts have been made in determining the most optimum methods in assessing hearing using both subjective and objective tests. Since hearing loss can occur due to disrupted peripheral and/or central auditory pathway, there is also a growing interest to study children with auditory processing disorder (APD). Even though notable achievements have been observed in understanding APD, more research is required, particularly in establishing a gold standard APD test and its specific interventions. Additionally, having an objective test such as speech-evoked auditory brainstem response is beneficial to understand how speech sounds are encoded within the brainstem region in hearing-impaired children, as well as in those with compromised neural function. In this book, we have gathered research from Malaysia and India in this field and hope it will be of interest to our readers"--
