sectors. Thus, lecturers and researchers in modern languages and applied linguistics departments have made great efforts to design syllabi and materials more attuned to the competences and requirements of potential working environments. At the same time, linguists have attempted to apply their expertise in wider areas, creating research institutes that focus on applying language and linguistics in different contexts and offering linguistic services to society as a whole. This book attempts to provide a global view of the multiple voices involved in interdisciplinary research and innovative proposals in teaching specialized languages while offering contributions that attempt to fill the demands of a varied scope of disciplines such as the sciences, professions, or educational settings. The chapters in this book are made up of current research on these themes: discourse analysis in academic and professional genres, specialized translation, lexicology and terminology, and ICT research and teaching of specialized languages.

"Translation and Lexicography" includes a selection of papers presented at the 1987 European Lexicographers' Conference (EURALEX). The volume gives a comprehensive impression of new developments in the making and use of dictionaries for translation purposes, providing practical and theoretical approaches, general and in-depth studies.

While the theories of Matte Blanco about the structure of the unconscious and the way in which it operates are generally recognised to be the most original since those of Freud, for many people the ways in which his ideas are expressed, including the use of terminology from mathematics and logic, make them difficult of access. Eric Rayner has written the first clear introduction to Matte Blanco's key concepts for psychotherapists and psychoanalysts and all those

concerned with moving psychoanalytic thinking forward. He sets out the central ideas in a way which is easy to understand and then shows, with examples, how they relate to clinical practice. He also describes how the ideas are related to those of people in other disciplines - mathematics, logic, psychology (specifically Piaget), and anthropology, among others. Drawing on the work of a group of people who have been inspired by Matte Blanco's thinking to extend their own ideas and test them out in the consulting room, this book reveals the significance of Matte Blanco's thought for future research.

The text of Ovid's *Metamorphoses* is not as indisputably established as one might think. Many passages are still obscure or plainly corrupt. 550 manuscripts, 500 editions and reprints, as well as countless critical notes and works must be taken into account when trying to establish the most reliable text for new generations of readers. This volume provides a detailed line-by-line analysis of Book XIII and offers thereby an indispensable starting point for a new critical edition not only of this but also of other parts of the poem.

Yuri Mikhailovich Lotman is the founder of the Moscow-Tartu School and the initiator of the discipline of cultural semiotics.

*A Worlde of Wordes*, the first-ever comprehensive Italian-English dictionary, was published in 1598 by John Florio. One of the most prominent linguists and educators in Elizabethan England, Florio was greatly responsible for the spreading of Italian letters and culture throughout educated English society. Especially important was Florio's dictionary, which – thanks to its exuberant wealth of English

definitions – made it initially possible for English readers to access Italy's rich Renaissance literary and scientific culture. Award-winning author Hermann W. Haller has prepared the first critical edition of *A Worlde of Wordes*, which features 46,000 Italian entries – among them dialect forms, erotic terminology, colloquial phrases, and proverbs of the Italian language. Haller reveals Florio as a brilliant English translator and creative writer, as well as a grammarian and language teacher. His helpful critical commentary highlights Florio's love of words and his life-long dedication to promoting Italian language and culture abroad.

The art of legislation, that had got lost, is reborn in this book from the classic tradition, which conceives the laws like wise and eloquent civic speeches, and the rhetoric as its basic method, of a such way, that the return to the ancient will be a true progress.
