Diversity-and-similarity-analysis | chemdsoft | software Diverse Similarity by Sharon Rose. Is the first book in a new sci-fi series. Though it could easily be called the first two. The book is in two parts that feel like complete stories in their own right. Each part has a compelling plot and a character development arch. Diverse Similarity is a cerebral sci-fi story. Much like the Star Trek franchise.

Diverse Similarity - delapac.com Real values of a similarity index must be evaluated relative to the expected maximum value of that index, which is the value obtained for samples randomly drawn from the same universe, with the diversity and sample sizes of the real samples. It is shown that these expected maxima differ from the theoretical maxima, the values obtained for two identical samples, and that the relationship between expected and theoretical maxima depends on sample size and on species diversity in all cases ...

This book constitutes the proceedings of the 8th International Conference on Similarity Search and Applications, SISAP 2015, held in Glasgow, UK, in October 2015. The 19 full papers, 12 short and 9 demo and poster papers presented in this volume were carefully reviewed and selected from 68 submissions. They are organized in topical sections named: improving similarity search methods and techniques; metrics and evaluation; applications and specific domains; implementation and engineering solutions; posters; demo papers.

Social capital is not only useful for the person who owns it, but it may also foster the integration of a society and the stability of a democracy. Friendly relations, social trust and norms of reciprocity ease the living together in a society and encourage people to take part in democratic decision making. This volume examines the differences in levels, causes and consequences of social capital between 22 European countries surveyed in the 2002 European Social Survey. At first glance, social capital differs strongly between countries. Yet the determinants of social capital differ strongly between European people as well. If one takes account of the latter, the former may no longer appear so large. The volume asks whether this is indeed the case so that a similarity of countries goes along with a diversity of people. To examine this, multi-level analyses are used in each contribution.

Current Topics in Management is an annual scholarly journal and this volume is divided into four major sections: Managing Conflict and Justice; Leadership, Social Capital, and Personality; Entrepreneurship and Small Business Management; and Ethics, Learning, and Change. These contributions seek an integration of theory, research, and practice, which is the essential goal of Current Topics in Management.The first section contains two empirical studies on organizational conflict and a theoretical work that addresses the application of organizational justice theory to consumer behavior. The second section contains three empirical studies relating to the leadership language used by senators Hillary Clinton and Barack Obama during the last presidential election, building social capital through leader-member exchanges, and the big-five personality and financial performance of fund managers. Section three contains an essay on revising Phelan's model on entrepreneurship and a case study on a small business organization. The fourth section contains three contributions, two theoretical papers and an empirical study of the administration of state governments.The contributions included are "The Moderating Role of Social Attitudes on the Relationship between Diversity and Conflict" "The Effects of Geographic Dispersion and Team Tenure" "Fairness and Consumer Behavior" "Obama vs. Clinton: Exploring the Impact of Leadership Language" "Social Capital Via Leader" "Financial Performance of Fund Managers" "A Conceptual Framework Linking Entrepreneurs to International New Venture Competitiveness" and "BSL Printing Company: A Case Study."

This book constitutes the proceedings of the Third International Workshop on Similarity Based Pattern Analysis and Recognition, SIMBAD 2015, which was held in Copenhagen, Denmark, in October 2015. The 15 full and 8 short papers presented were carefully reviewed and selected from 30 submissions.The workshop focus on problems, techniques, applications, and perspectives: from supervisedto unsupervised learning, from generative to discriminative models, and fromtheoretical issues to empirical validations.

In recent years the fundamental concepts and applied methodologies of molecular similarity analysis have experienced a revolutionary development. Motivated by the increased degree of understanding of elementary molecular properties on the levels ranging from fundamental quantum chemistry to the complex interactions of biomolecules, and aided by the spectacular progress in computer technology and access to computer power, the area has opened up to many new ideas and new approaches. This book covers topics in quantum similarity approaches, electron density shape analysis methods, and it provides better theoretical understanding of molecular similarity. Additionally, quantitative shape analysis, especially activity relations (QSHAR) and the prediction of the pharmacological or toxicological effects of molecules in the related context of quantum QSAR (QQSAR). This volume written by the experts in the various subfields of molecular similarity, provides a collection of the most recent ideas, advances, and methodologies. It is the hope of the Editors that by representing these topics within a single volume, the readers will find a balanced overview of the status of the field. We also hope that the book will serve as a tool for selecting and assessing the best approach for various new types of problems of molecular similarity that may arise and it will provide a set of easy references for further studies and applications.
