Written by two certified human factors/ergonomics professionals and a criminalist and firearms expert, all of whom have testified as expert witnesses, Human Factors in Handgun Safety and Forensics draws on their formidable collective knowledge and professional experience to present the first scientifically based volume in the field. This seminal work identifies numerous human factors in handgun design, training, and related human behavior in unintentional and inadvertent shooting incidents. It describes the discipline of human factors and ergonomics and includes available statistics on shootings, examines their limitations, and reviews actual cases to determine human causes in unintentional and inadvertent shootings.
