Anatomy, in layman terms, is the study of the relationship and structure of human body parts. In other words, it gives us a clear picture of each of the different body parts and they relate to other parts. Physiology, on the other hand, studies the whole body as a unit and the function of each part.

Introduces the structure and functions of the human body and the effects of disease or illness on normal body function. Uses easy-to-understand language and clear color illustrations to make learning more visual and
