Durkheim's Suicide: A Century of Research and Debate ...

Durkheim's study of suicide gave birth to sociology. He wrote in the late 19 th century using a positivist belief system that society can be studied as a science, and be observed and studied just as we do when studying the natural world. Durkheim wanted to show that suicide was linked to society, and then the value of sociology could be established.

Durkheim's study of suicide: revision notes with ...

Suicide was highly increased in European countries including Germany, Italy, France and England in the 19 th century where it had come to a point of requiring explanation on the basis of social problem. In this regard, Durkheim's book on "Suicide" was the first systematic scientific study which talked about suicide (Emirbayer, 2003).

Evaluation of Emile Durkheim's Suicide Theory

Suicide: A Study in Sociology is an 1897 book written by French sociologist Émile Durkheim. It was the first methodological study of a social fact in the context of society. It is ostensibly a case study of suicide, a publication unique for its time that provided an example of what the sociological monograph should look like. According to Durkheim, the term suicide is applied to all cases of death resulting directly or indirectly from a positive or negative act of the victim himself, which ...

Durkheim's Suicide | Taylor & Francis Group

Anomic suicide - this is the suicide which is committed through too little regulation in a person's life. This can be seen mostly in cases of dramatic economic and social change (for example, the change in the economy in Greece has affected the once low suicide rate) [Another example could be potentially veterans, who once had a lot of regulation and have then exited the military with no ...

What was Durkheim's study of suicide? | MyTutor

Durkheim in his classical study of 'Le Suicide' which was published in 1897, demonstrates that neither psycho-pathic factor nor heredity nor climate nor poverty, nor unhappy love nor other personal factors motivate along form sufficient explanation of suicide. According to Durkheim, suicide is not an individual act nor a personal action.

Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Emile Durkheim's On Suicide (1897) was a groundbreaking book in the field of sociology. Traditionally, suicide was thought to be a matter of purely individual despair but Durkheim recognized that the phenomenon had a social dimension. He believed that if anything can explain how individuals relate to society, then it is suicide: Why does it happen? What goes wrong? Why do certain social, religious or racial groups have higher incidences of suicide than others? As Durkheim explored these questions he became convinced that abnormally high or low levels of social integration lead to an increased likelihood of suicide. On Suicide was the result of his extensive research. Divided into three parts - individual reasons for suicide, social forms of suicide and the relation of suicide to society as a whole - Durkheim's revelations have fascinated, challenged and informed readers for over a century.

What drives a person to take his or her own life? Why would an individual be willing to strap a bomb to himself and walk into a crowded marketplace, blowing himself up at the same time as he kills and maims the people around him? Does suicide or 'voluntary death' have the same meaning today as it had in earlier centuries, and does it have the same significance in China, India and the Middle East as it has in the West? How should we understand this distressing, often puzzling phenomenon and how can we explain its patterns and variations over time? In this wide-ranging comparative study, Barbagli examines suicide as a socio-cultural, religious and political phenomenon, exploring the reasons that underlie it and the meanings it has acquired in different cultures throughout the world. Drawing on a vast body of research carried out by historians, anthropologists, sociologists, political scientists and psychologists, Barbagli shows that a satisfactory theory of suicide cannot limit itself to considering the two causes that were highlighted by the great French sociologist Émile Durkheim - namely, social integration and regulation. Barbagli proposes a new account of suicide that links the motives for and significance attributed to individual actions with the people for whom and against whom individuals take their lives. This new study of suicide sheds fresh light on the cultural differences between East and West and greatly increases our understanding of an often-misunderstood act. It will be the definitive history of suicide for many years to come.

The Handbook of the Sociology of Death, Grief, and Bereavement sets issues of death and dying in a broad and holistic social context. Its three parts explore classical sociology, developments in sociological thought, and the ways that sociological insights can be useful across a broad spectrum of grief-related topics and concerns. Guidance is given in each chapter to help spur readers to examine other topics in thanatology through a sociological lens. Scholars, students, and professionals will come away from the handbook with a nuanced understanding of the social context -cultural differences, power relations, the role of social processes and institutions, and various other sociological factors - that shape grief experiences.

An authoritative and comprehensive collection of essays redefining the relevance of Durkheim to the human sciences in the twenty-first century.

Suicide: Theory, Practice and Investigation is the only text available in paperback form that offers an accessible overview of suicide in the United States. Written by Ronald M. Holmes and Stephen T. Holmes, two of the foremost authors of murder and violent crime books in the world, this book examines the social problem and criminal justice concerns of suicide from unique perspectives. The authors discuss the various forms of suicide and analyze the latest data on regional differences and how gender, marital status, occupation, health, drug use, and religion all influence the practice of suicide.

Emile Durkheim's *On Suicide* (1897) was a groundbreaking book in the field of sociology. Traditionally, suicide was thought to be a matter of purely individual despair but Durkheim recognized that the phenomenon had a social dimension. He believed that if anything can explain how individuals relate to society, then it is suicide: Why does it happen? What goes wrong? Why do certain social, religious or racial groups have higher incidences of suicide than others? As Durkheim explored these questions he became convinced that abnormally high or low levels of social integration lead to an increased likelihood of suicide. *On Suicide* was the result of his extensive research. Divided into three parts - individual reasons for suicide, social forms of suicide and the relation of suicide to society as a whole - Durkheim's revelations have fascinated, challenged and informed readers for over a century.
