Twenty Years of Education Transformation in Gauteng 1994 to 2014: An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994. These essays talk to what a provincial education department does and how and why it does these things - whether it be about policy, resourcing or implementing projects. Each essay is written by one or more specialist in the relevant focus area. The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader. It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years, both nationally and provincially. There has been no attempt to fit the book's chapters into a particular ideological or educational paradigm, and as a result the reader will find differing views on various aspects of the Gauteng Department of Education's present and past. We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years.

An excellent book for Science, Arts and Commerce students appearing in competitive, professional and other examinations. 1. English (Core), 2. 5 Model Papers (with OMR Sheet), 3. Examination Paper

The author grew up in South Africa. His book describes a life style of education both in Johannesburg and then in Oxford in the mid-20th Century. A medical career in physiology, general surgery and neurosurgery led to encounters with patients, medical colleagues and tort lawyers whose personal stories, talents and idiosyncrasies colour the book. These histories are painted against the background of the trials and tribulations of the practice of medicine in South Africa in the era when Verwoerd and his successors strode the stage. Interspersed throughout are excerpts from the life stories and scientific contributions of researchers in the fields of surgical physiology, general and spinal surgery. The dramatic progress of neuroradiology and aspects of medicine and surgery across the century form a backdrop to the catalogue of life in the "Black" hospitals of Johannesburg. The problems of medical ethics of survival from womb to tomb, and the conflicts that arise from cultures and legal constraints against the practice of euthanasia, are always in play. Right to life issues contrast with a death wish of some personalities in a morbid field of medicine and add to the drama of life and death played out in the story. This volume will appeal to doctors, lawyers, patients, road crash victims, and anybody with an interest in the wide fields of medical and social history of the 20th Century.
