ECG, NTE, and SK are lines of universal replacement semiconductors. The underlying concept is that each ECG, NTE, or SK numbered device can replace a group of other semiconductors. For example, the single most popular ECG and NTE transistor, the 123AP, replaces thousands of different OEM and industry standard part numbered transistors. When the Delco DTS line of power transistors were discontinued, SIE began using the ECG165 in their 300 volt downhole power supplies (the later schematics ...

pathologies that hospitalists, internal medicine physicians, family medicine physicians, and emergency medicine physicians must recognize. The format of Rapid Interpretation of ECGs in Emergency Medicine is to first show an ECG in its native state to give you the chance to recognize and interpret salient features. The page can then be flipped to look at the same ECG with abnormal patterns enlarged, highlighted in color, and described in brief text. The ECGs are presented with and without annotations so you can test your diagnostic skills.
