SCIENCE AND EMPIRES. FROM THE INTERNATIONAL COLLOQUIUM TO THE BOOK Patrick PETITJEAN, Catherine JAMI and Anne Marie MOULIN The International Colloquium "Science and Empires - Historical Studies about Scientific De velopment and European Expansion" is the product of an International Colloquium, "Sciences and Empires - A Comparative History of Scien tific Exchanges: European Expansion and Scientific Development in Asian, African, American and Oceanian Countries". Organized by the REHSEIS group (Research on Epistemology and History of Exact Sciences and Scientific Institutions) of CNRS (National Center for Scientific Research), the colloquium was held from 3 to 6 April 1990 in the UNESCO building in Paris. This colloquium was an idea of Professor Roshdi Rashed who initiated this field of studies in France some years ago, and proposed "Sciences and Empires" as one of the main research programmes for the The project to organize such a colloquium was a bit REHSEIS group. of a gamble. Its subject, reflected in the title "Sciences and Empires", is not a currently-accepted sub-discipline of the history of science; rather, it refers to a set of questions which found autonomy only recently. Rosemary is for remembrance; sage is for wisdom. The symbolism of plants Ñ whether in the ancient Greek doctrine of signatures or the Victorian secret language of flowers Ñ has fascinated us for centuries. Contemporary herbalist Maia Toll adds her distinctive spin to this tradition with profiles of the mysterious personalities of 36 herbs, fruits, and flowers. Smaller versions of the illustrations are featured on 36 cards to help guide your thoughts and meditations.

This book uses simple language to explain the essence of Shanghanlun (Treatise on Cold Damage), a monumental ancient medical classic, paired with cases the author encountered during years of practicing Chinese medicine, allowing readers to understand the melding of theory and practice and philosophical views of nature and life. This unique book provides a comprehensive picture of the vivid kaleidoscope of traditional medicine in Asia presented by 34 eminent authors from 15 countries belonging to the different systems like Ayurveda and Chinese Traditional Medicine. Important emerging areas such as harmonization of the traditional systems with modern medicine and the growing role of these systems in the health care structure of countries are also dealt with. Legislation and regulation of these systems and practitioners, an area of growing concern, the need for good preclinical toxicology studies and scientific clinical evaluation of the products and medicinal plants used for therapy are exhaustingly dealt with. The vital issue of protection of traditional systems of medicine and patenting of medicinal plants is discussed in detail. The book is replete with suggestions, and ideas aimed at making traditional systems more effectively, and more widely used for health care. The book also covers the prevailing situation regarding the use and other aspects of traditional medicine in the 10 Member countries of the South-East Asia Region of the World Health Organization.

This study is the first to assemble the evidence for the existence of sorcerers in the ancient world, it also addresses the question of their identity and social origins. The resulting investigation takes us to the underside of Greek and Roman society, into a world of wandering holy men and women, conjurors and wonder-workers, and into the lives of prostitutes, procuresses, charioteers and theatrical performers. This fascinating reconstruction of the careers of witches and sorcerors allows us to see into previously inaccessible areas of Greco-Roman life. Compelling for both its detail and clarity, and with an extraordinarily revealing breadth of evidence employed, it will be an essential resource for anyone studying ancient magic.
