The Employment Tax Incentive (ETI) is an incentive that was launched by SARS with the aim of encouraging employers to hire young job seekers. It reduces the cost of hiring young people by reducing the amount of PAYE owed by the employer to SARS without affecting the employees' wages. Please note: you are under no obligation to claim ETI.

'Encountering ETI' weaves together scientific knowledge and spiritual faith in a cosmic context. It explores consequences of Contact between terrestrial intelligent life (TI) and extraterrestrial intelligent life (ETI). Humans will face cosmic displacement if there are other complex, technologically advanced intelligent beings in the universe; our economic structures and religious beliefs might need substantial revision. On Earth or in space, humans could encounter benevolent ETI (solicitous of our striving for maturity as a species) or malevolent ETI (seeking our land and goods to benefit themselves, claiming that their "superior civilization" gives them the right) --or meet both types of species. Earth Encounters of the Third Kind described by credible witnesses (including American Indian elders) suggest that both have arrived already; some shut down U.S. and U.S.S.R. ICBM missiles to promote peace; others mutilated cattle or abducting people, perhaps to acquire physiological data on biota for scientific study or for other, unknown purposes. Scifi movies such as Avatar and novels like The Martian Chronicles describe humans as malevolent ETI aliens: we do to others what we fear others will do to us. A shared and evolving spiritual materiality could enable humanity to overcome cosmic displacement, and guide TI and ETI in a common quest for meaning and wellbeing on cosmic common ground.

Based on many years of hands-on teaching experience involving students and practicing engineers alike, this text offers an ideal introduction to the design and performance of turbomachinery. Pumps, compressors, and turbines are described in detail, with emphasis on their key features and the flow equations relevant to each part of the machine. Experimental data are presented to aid understanding. Also covered are boundary layer and computational techniques for flow prediction, stability limits, and structural and modal analysis of blades and rotors. Test bed, laboratory, and workshop procedures for turbomachinery development together with instrumentation issues are also covered, drawing on the authors' wide experience. Fully illustrated and comprehensive in its treatment of turbomachinery types, Introduction to Turbomachinery provides the most up-to-date account of the subject for final-year undergraduates or new graduates beginning a study of turbomachinery, as well as a refresher and reference text for established practitioners.

The ETI Grail provides scientifically verified details and translation of communications dispatched via three unprecedented events, two of which occurred within our atmosphere, the third occurring further out. Revealed here for the first time is rock-solid evidence of non-human activity and an "intelligence" never before dreamed of.

"We do not yet have any scientific evidence for or against extraterrestrial life. The 'not yet' here is important since the scientific search is becoming increasingly more sophisticated and the anticipation more intense. Encountering ETI manages to raise the level of anticipation significantly while respecting the need for good science, a need not always respected in the public domain." --George V. Coyne, Director Emeritus, Vatican Observatory; author of Wayfarers in the Cosmos (with Alessandro Omizzolo) "Encountering ETI goes beyond the existence of extraterrestrial intelligence. John Hart presents compelling evidence that humans have already encountered an ETI presence and explores scenarios and considerations for future encounters. He reminds us of our own history of human exploitation and concludes that we must undergo a transformation as we explore extraterrestrial intelligences. I highly recommend this book for serious consideration to questions of universal ethics and behaviors as we begin a new phase in our evolution." --Robert Salas, USAF (ret.) author of Unidentified: The UFO Phenomenon "Fasten your seatbelts! John Hart will take us for a ride above the stratosphere into the outer cosmos. In the rearview mirror we'll re-examine and re-evaluate our current conduct on our home planet. We'll re-evaluate terrestrial poverty, pollution, and political strife. Holding up the rearview mirror will be UFO experiencers, those who believe they have been contacted by an extraterrestrial civilization. I am delighted to see academic colleagues recognizing the potential value of analyzing the UFO phenomenon for political, moral, and spiritual purposes." --Ted Peters, Pacific Lutheran Theological Seminary; author of UFOs--God's Chariots? "Encountering ETI, together with its predecessor, Cosmic Commons, will bring you right back to Earth and Homo sapiens. Sometimes it takes the eccentric perspective to clear the eyes, see our own habitat, and know ourselves for the first time. John Hart is a good fellow traveler and guide." --Larry Rasmussen, Reinhold Niebuhr Professor Emeritus of Social Ethics, Union Theological Seminary; author of Earth-Honoring Faith John Hart, Boston University professor, links the far out with the down to Earth when teaching and writing. His innovative ideas make him a wanted man: he travels often around Earth (five continents, eight countries so far--not via spacecraft) speaking on science-religion-ecology-social justice. His most recent book was Cosmic Commons: Spirit, Science, and Space (Cascade, 2013).

Global Evidence of the UFO and ETI presence is the first book in a series of six volumes that was originally written as a single 3500 page treatise entitled "A Citizen's Disclosure on UFOs and ETI". Together, this series of books are the most comprehensive and definitive books of their kind offering the novice and clear path for further research as well as offering the seasoned UFO investigator some thought provoking alternative insights. With a massive bibliography, webliography and videography each book becomes interactive with numerous web links expanding and already colossal book into an encyclopedic tome. These volumes are sure to become your go-to UFO and ETI reference manuals. Each volume stands complete filled with hundreds of coloured photographs presenting the best evidence on the UFO and ETI phenomenon from a citizen's perspective that draws from the author's 65 years of personal experiences, contacts, research and investigations. In Volume One "Global Evidence of the UFO and ETI Presence" you will learn: - Human history is far older than previously thought and that our evolution has been frequently influenced by an ancient ET presence as found in caves paintings, ancient petroglyphs and medieval artwork. - The UFO Community has been ghettoized with a corrupted UFO data base compounded by misunderstanding from within and by a propaganda campaign of deception by the military industrial complex. - Most Ancient Alien Theorists have through re-interpretation and speculation promoted widely held misconceptions of what is actually in the holy books of the world's major religions. - Do some religions speak specifically about life on other planets in their holy texts? Surprisingly, a young world-embracing religion may hold some of the best answers and insights into the UFO question. - What are the characteristics and phenomenology of unidentified flying objects? - How to become a better, more credible observer by properly identifying conventional aerial objects from those truly extraordinary extraterrestrial flying objects. - The similarities and unique differences of the global UFO/ETI phenomenon that are often suppressed by governments and their military and intelligence communities. - The psychology of UFOs and its effects on the human witnesses from leading psychologists. - What is the Extraterrestrial Hypothesis and how does it differ from the other related hypotheses? - Categorizing the kinds of UFO encounters and the classifications of Extraterrestrial Intelligences visiting the Earth. - Knowing the differences and similarities between extraterrestrial and paranormal realities. - Understanding the holographic universe and the holographic paradigm and resolving the Fermi Paradox. The journey into a bigger universe has just begun and the exploration promises to be mind-blowing, exhilarating and positive! Enjoy the ride!
