EC law¹ is only one part of the European Union and of EU law. All gender equality law is law that originates in the EC Treaty, which is older than the EU Treaty. Therefore, while we may speak about EU gender equality law, the more precise references are to the EC Treaty. When - and if - the Lisbon Treaty enters into force, the EC and the EU will be merged into one single unit, the European Union.

Overview of EU anti-discrimination law and human rights frameworks The promotion of equality and respect for human rights is now a core element of the European Union's goals, legislation and institutions. The principle of equality has been an element of its foundations from its early days, and first developed in the context of gender equality.

Sex Equality Law in the European Union:

Professor Evelyn Ellis provides an analytical and critical examination of the EU law forbidding discrimination, and explores the theoretical and philosophical underpinnings of the law.

EU equality law is multidimensional in being based on different rationales and concepts. Consequently, the concept of discrimination has become fragmented, with different instruments envisaging different scopes of protection. This raises questions as to the

ability of EU law to address the situation of persons excluded on a number of grounds. This edited collection addresses the increasing complexity of European Equality Law from jurisprudential, sociological and political science perspectives. Internationally renowned researchers from Scandinavian, Continental and Central European countries and Britain analyse consequences of multiplying discrimination grounds within EU equality law, considering its multidimensionality and intersectionality. The contributors to the volume theorise the move from formal to substantive equality law and its interrelation to new forms of governance, demonstrating the specific combination of non-discrimination law with welfare state models which reveal the global implications of the European Union. The book will be of interest to academics and policy makers all over the world, in particular to those researching and studying law, political sciences and sociology with an interest in human rights, non discrimination law, contract and employment law or European studies.

Offering an alternative exploration of the Court of Justice of the European Union (CJEU) and its work, this book aims to start a conversation between legal, political and gendered examinations of the Court of Justice and some of the substantive areas of law it is concerned with. In doing so, it provides a

broader and more holistic view of the Court and its work which can add to our understanding of the institution, its role and its case law as well as the contribution it can and does make to shaping law and policy and EU and national level.

The EU has slowly but surely developed a solid body of equality law that prohibits different facets of discrimination. While the Union had initially developed anti-discrimination norms that served only the commercial rationale of the common market, focusing on nationality (of a Member State) and gender as protected grounds, the Treaty of Amsterdam (1997) supplied five additional prohibited grounds of discrimination to the EU legislative palette, in line with a much broader egalitarian rationale. In 2000, two EU Equality Directives followed, one focusing on race and ethnic origin, the other covering the remaining four grounds introduced by the Treaty of Amsterdam, namely religion, sexual orientation, disabilities and age. Eighteen years after the adoption of the watershed Equality Directives, it seems timely to dedicate a book to their limits and prospects, to look at the progress made, and to revisit the rise of EU anti-discrimination law beyond gender. This volume sets out to capture the striking developments and shortcomings that have taken place in the interpretation of relevant EU secondary law. Firstly, the book unfolds an up-to-date

Systematic reappraisal of the five 'newer' grounds of discrimination, which have so far received mostly fragmented coverage. Secondly, and more generally, the volume captures how and to what extent the Equality Directives have enabled or, at times, prevented the Court of Justice of the European Union from developing even broader and more refined anti-discrimination jurisprudence. Thus, the book offers a glimpse into the past, present and - it is hoped - future of EU anti-discrimination law as, despite all the flaws in the Union's 'Garden of Earthly Delights', it offers one of the highest standards of protection in comparative anti-discrimination law.

The new edition of this major work is a must-buy for all students studying EU employment law. It offers comprehensive coverage of an increasingly complex subject, tackling both case law and legislation, and provides detailed analysis of the EU's Directives and their impact on employment law.

Consists of interviews with American professors.

The supranational law of the European Union represents a uniquely powerful, far-reaching, and controversial instance of the growth of international legal governance, one that has forever altered the political and legal landscape of its Member States. The EU has

attracted significant attention from political scientists, economists, and lawyers who have analysed its polity and constructed theoretical models of the integration process. Yet it has been almost entirely neglected by analytic philosophers, and the philosophical tools that have been developed to analyse and evaluate the Union are still in their infancy. This book brings together legal philosophers, political philosophers, and EU legal academics in the service of developing the philosophical analysis of EU law. In a series of original and complementary essays they bring their varied disciplinary expertise and theoretical perspectives to bear on central issues facing the Union and its law. Combining both abstract thought in legal and political philosophy and more tangible theoretical work on specific legal issues, the essays in this volume make a significant contribution to developing work on the philosophical foundations of EU law, and will engender further debate between philosophers, political philosophers, and EU legal academics. They will be of interest to all those engaged in understanding the nature and purpose of this unique legal entity.

legal, political, social and economic perspectives, there has been little analysis of the effects of Brexit on women and gender/sexual minorities who have historically been marginalised and whose voices have been less audible in political debates - both nationally and at the European level. The collection explores how Brexit might change the equality, human rights and social justice landscape, but from the viewpoint of women and gender/sexual minorities. The contributions gathered in it demonstrate the variety of ways that Brexit will make a difference to the lives of women and individuals marginalised because of gender or sexual identity.
