This book traces how and why the secession of the South during the American Civil War was accomplished at ground level through the actions of ordinary men. Adopting a micro-historical approach, Lawrence T. McDonnell works to connect small events in new ways - he places one company of the secessionist Minutemen in historical context, exploring the political and cultural dynamics of their choices. Every chapter presents little-known characters whose lives and decisions were crucial to the history of Southern disunion. McDonnell asks readers to consider the past with fresh eyes, analyzing the structure and dynamics of social networks and social movements. He presents the dissolution of the Union through new events, actors, issues, and ideas, illuminating the social contradictions that cast the South's most conservative city as the radical heart of Dixie.

ARM-based Microcontroller Projects Using mbed gives readers a good understanding of the basic architecture and programming of ARM-based microcontrollers using ARM's mbed software. The book presents the technology through a project-based approach with clearly structured sections that enable readers to use or modify them for their application. Sections include: Project title, Description of the project, Aim of the project, Block diagram of the project, Circuit diagram of the project, Construction of the project, Program listing, and a Suggestions for expansion. This book will be a valuable resource for professional engineers, students and researchers in computer engineering, computer science, automatic control engineering and mechatronics. Includes a wide variety of projects, such as digital/analog inputs and outputs (GPIO, ADC, DAC), serial communications (UART, 12C, SPI), WIFI, Bluetooth, DC and servo motors Based on the popular Nucleo-L476RG development board, but can be easily modified to any ARM compatible processor Shows how to develop robotic applications for a mobile

In the last 20 years I have been personally involved with PROFIBUS: teaching it at the University, working on projects and leading workshops for industry. During this time, various descriptions and guides to different aspects of PROFIBUS were developed. I was helped in this by the contacts I had with industry and a range of experts in my capacity as chairman of PROFIBUS Switzerland and head of the PROFIBUS Competence Centre (PICC) at the Bern University of Applied Sciences. I have now brought these documents together in the form of a manual. Its purpose is to simplify entry to the world of PROFIBUS for a wider public. Now I generated an electronic book version with active links for the usage on iPad or Android tablet computers.

New York Times bestselling author Mercedes Lackey has enchanted readers since the publication of her first novel, *Arrows of the Queen*. Now she takes readers on another thrilling journey with the first novel in her *Mage Winds* series... High magic had been lost to Valdemar when he gave his life to save his kingdom from destruction by the dark sorceries. Now it falls to Elspeth Herald, heir to the throne, to take up the challenge and seek a mentor who will awaken her mage abilities.
