Fahrenheit | Marley Engineered Products

After a little research, I chose a new Fahrenheit FUH54 garage heater. At 5000 watts, it is still undersized for my 24' x 28' garage, but it will provide more heat than my old heater did. Fahrenheit makes a 7500 watt model also, but I would have had to run new wiring for that one. The existing wiring already had 10/3 cable, so the FUH54 was the ...

Installing a Fahrenheit FUH54 Electric Garage Heater

Quick comfort — that's what you'll get with this baseboard convector. This hard-wired heater provides fan-free warmth without circulating dust and debris. There's no need to worry about the unit

Dial heater controls provide easy operation; built-in thermostat adjusts from 45 degrees to 135 degrees Fahrenheit, letting you customize heat levels High-level cut-out automatically deactivates the heater at excessive heat levels and reactivates it automatically when temperature returns to normal for safe use

This is a basic "how-to" on creating your own Aluminum can space heater. This Book provides seven easy-to-follow steps on how to make your own DIY Aluminum Can Solar Heater. This heating unit, which is composed of materials that can be picked up at any home improvement store for less than \$100.00, is capable is generating heat of up to 185 degrees Fahrenheit on any sunny winter day. The unit is eco-friendly and weighs less than 30 lbs when fully built.

The present Food Sanitation Center (FSC) relies upon either the non-powered M2 gasoline burner or the electrically powered MBU logistics-fuel burner. Because of the open burners, it is inefficient and uncomfortable to operate. Various approaches to heating the sanitizing sink and rinse water of a Self-Powered FSC (SP-FSC) were investigated including direct heating of the sanitizing sink by a burner, indirect heating of the sink by an external fuel-fired hydronic heater, and heating the sink by steam injection. Various diesel-fired steam/water heaters and burners were evaluated. The final approach consisted of a lightweight logistics-fueled boiler capable of generating 44 lb/hr of low-pressure steam at 80% combustion efficiency with an integral thermoelectric generator that supplies sufficient electricity (40 W) for operating its burner and the electric water pump. The burner-base used is the bottom portion of an Army H-45 logistics-fueled space heater. The SP-FSC employs a shallow wash sink that provides a work surface and 110 degrees Fahrenheit water spray for manual cleaning of cookware. Items are rinsed with a 140 degrees Fahrenheit hot water spray and sanitized by immersion in a tank that is maintained at a minimum temperature of 170 degrees Fahrenheit by direct steam injection.

The pop-up camping "Bible" is here! This book contains a wealth of information, practical instructions, and numerous tips, tricks and techniques for the novice or expert camper. The tent camping fan, the die-hard RV lover, and everyone in between is sure to find something useful in *Camping in a Pop-Up Camper is Paradise*. Calling on her own humorous "learning curve," the author shows how, with a few skills and a little know-how, almost anyone can learn to enjoy camping without feeling deprived of any modern conveniences. Checklists to make it all easy are included: Personal, recreational, and day-hike packing. Tools kept in the camper and a toolbox. Perishable groceries and stocked food. First aid, bugs, bites, and rashes. Winterizing your tent-trailer. Camper packing list. Steps to pop-up. Learning what to do and what NOT to do when camping just got easy. This is your ultimate "how-to" book on tent-trailer camping!

Aquarium basics, equipment, caring for fish.
