Comprehensive Preparedness Guide (CPG) 101 provides Federal Emergency Management Agency (FEMA) guidance on the fundamentals of planning and developing emergency operations plans (EOP). CPG 101 shows that EOPs are connected to planning efforts in the areas of prevention, protection, response, recovery, and mitigation. Version 2.0 of this Guide expands on these fundamentals and encourages emergency and homeland security managers to engage the whole community in addressing all risks that might impact their jurisdictions. While CPG 101 maintains its link to previous guidance, it also reflects the reality of the current operational planning environment. This Guide integrates key concepts from national preparedness policies and doctrines, as well as lessons learned from disasters, major incidents, national assessments, and grant programs. CPG 101 provides methods for planners to: Conduct community-based planning that engages the whole community by using a planning process that represents the actual population in the community and involves community leaders and the private sector in the planning process; Ensure plans are developed through an analysis of risk; Identify operational assumptions and resource demands; Prioritize plans and planning efforts to support their seamless transition from development to execution for any threat or hazard; Integrate and synchronize efforts across all levels of government. CPG 101 incorporates the following concepts from operational planning research and day-to-day experience: The process of planning is just as important as the resulting document; Plans are not scripts followed to the letter, but are flexible and adaptable to the actual situation; Effective plans convey the goals and objectives of the intended operation and the actions needed to achieve them. Successful operations occur when organizations know their roles, understand how they fit into the overall plan, and are able to execute the plan. Comprehensive Preparedness Guide (CPG) 101 provides guidelines on developing emergency operations plans (EOP). It promotes a common understanding of the fundamentals of risk-informed planning and decision making to help planners examine a hazard or threat and produce integrated, coordinated, and synchronized plans. The goal of CPG 101 is to make the planning process routine across all phases of emergency management and for all homeland security mission areas. This Guide helps planners at all levels of government in their efforts to develop and maintain viable all-hazards, all-threats EOPs. Accomplished properly, planning provides a methodical way to engage the whole community in thinking through the life cycle of a potential crisis, determining required capabilities, and establishing a framework for roles and responsibilities. It shapes how a community envisions and shares a desired outcome, selects effective ways to achieve it, and communicates expected results. Each jurisdiction's plans must reflect what that community will do to address its specific risks with the unique resources it has or can obtain. Planners achieve unity of purpose through coordination and integration of plans across all levels of government, nongovernmental organizations, the private sector, and individuals and families. This

supports the fundamental principle that, in many situations, emergency management and homeland security operations start at the local level and expand to include Federal, state, territorial, tribal, regional, and private sector assets as the affected jurisdiction requires additional resources and capabilities. A shared planning community increases the likelihood of integration and synchronization, makes planning cycles more efficient and effective, and makes plan maintenance easier.

"Protecting and ensuring the resiliency of the critical infrastructure and key resources (CIKR) of the United States is essential to the nation's security, public health and safety, economic vitality, and way of life. Attacks on CIKR could significantly disrupt the functioning of government and business alike and produce cascading effects far beyond the targeted sector and physical location of the incident. Direct terrorist attacks and natural, manmade, or technological hazards could produce catastrophic losses in terms of human casualties, property destruction, and economic effects, as well as profound damage to public morale and confidence. Attacks using components of the nation's CIKR as weapons of mass destruction could have even more devastating physical and psychological consequences"--Page 1.

As an instructor, you have seen business continuity and risk management grow exponentially, offering an exciting array of career possibilities to your students. They need the tools needed to begin their careers -- and to be ready for industry changes and new career paths. You cannot afford to use limited and inflexible teaching materials that might close doors or limit their options. Written with your classroom in mind, *Business Continuity and Risk Management: Essentials of Organizational Resilience* is the flexible, modular textbook you have been seeking -- combining business continuity and risk management. Full educator-designed teaching materials available for download. From years of experience teaching and consulting in Business Continuity and Risk, Kurt J. Engemann and Douglas M. Henderson explain everything clearly without extra words or extraneous philosophy. Your students will grasp and apply the main ideas quickly. They will feel that the authors wrote this textbook with them specifically in mind -- as if their questions are answered even before they ask them. Covering both Business Continuity and Risk Management and how these two bodies of knowledge and practice interface, *Business Continuity and Risk Management: Essentials of Organizational Resilience* is a state-of-the-art textbook designed to be easy for the student to understand -- and for you, as instructor, to present. Flexible, modular design allows you to customize a study plan with chapters covering: Business Continuity and Risk principles and practices. Information Technology and Information Security. Emergency Response and Crisis Management. Risk Modeling -- in-depth instructions for students needing the statistical underpinnings in Risk Management. Global Standards and Best Practices Two real-world case studies are integrated throughout the text to give future managers experience in applying chapter principles to a service company and a manufacturer. Chapter objectives, discussion topics, review questions, numerous charts and graphs. Glossary and Index. Full bibliography at the end of each chapter. Extensive, downloadable classroom-tested Instructor Resources are available for college courses and professional development training, including slides, syllabi, test bank, discussion questions, and case studies. Endorsed by The Business Continuity Institute (BCI) and The Institute of Risk Management (IRM). QUOTES "It's difficult to write a book that serves both academia and practitioners,

but this text provides a firm foundation for novices and a valuable reference for experienced professionals."--Security Management Magazine "The authors...bring the subject to life with rich teaching and learning features, making it an essential read for students and practitioners alike." – Phil AUTHOR BIOS Kurt J. Engemann, PhD, CBCP, is the Director of the Center for Business Continuity and Risk Management and Professor of Information Systems in the Hagan School of Business at Iona College. He is the editor-in-chief of the International Journal of Business Continuity and Risk Management Douglas M. Henderson, FSA, CBCP, is President of Disaster Management, Inc., and has 20+ years of consulting experience in all areas of Business Continuity and Emergency Response Management. He is the author of Is Your Business Ready for the Next Disaster? and a number of templates.

This book provides an overview of all aspects of search and rescue procedures and equipment, It teaches the absolutely essential techniques employed by nearly all search and rescue personnel. This book offers an in-depth and practical approach to search and rescue and is recommended for all emergency responders. For both paid and unpaid professionals, this resource combines dynamic features with the latest comprehensive content.

Geared towards those deployed to disaster sites as part of the response, this guide offers extensive information on how to make assessments and reports, coordinate with military in the field and participate as a member of a Disaster Assistance Response Team. Original.
