Revised edition of the author's *Financial accounting*, [2015]

Enhancements in technology have changed how we live and learn. Working with learning resources across devices, whether smartphones, tablets, or laptop computers, empowers students to drive their own learning by putting increasingly intelligent technology into their hands. Whether the goal is to become an accountant, a businessperson, or simply an informed consumer of accounting information, *Financial and Managerial Accounting* has helped generations of students succeed. Its leading edge accounting content, paired with state-of-the-art technology, supports student learning and elevates understanding of key accounting principles. *Financial and Managerial Accounting* also delivers innovative technology to help student performance. Connect Accounting provides students with a media-rich eBook version of the textbook and offers instant grading and feedback for assignments that are completed online. Our system for completing exercise and problem material takes accounting content to the next level, delivering assessment material in a more intuitive, less restrictive format that adapts to the needs of today's students.

Financial Accounting: Information for Decisions, 6th edition, addresses the topics and issues typically covered in the financial accounting course, while at the same time motivating student interest in accounting through its extensive use of entrepreneurial examples, application of analysis skills, integration of online course management, and a highly engaging pedagogical design. This book thoroughly integrates ideas and practices followed by today's business entrepreneurs, speaking more directly to students and better preparing them to enter the work force.

Financial and Managerial Accounting: The Basis for Business Decisions continues to offer a solid foundation for students who are learning basic accounting concepts. Known for giving equal weight to financial and managerial topics, the authors emphasize the need for a strong foundation in both aspects of accounting. Hallmarks of the text - including the solid Accounting Cycle Presentation, managerial decision making, relevant pedagogy, and high quality, end-of-chapter material-have been updated throughout the book.

This comprehensive and up-to-date guide to using financial statements as an aid to decision-making incorporates numerous suggestions from practicing financial statement analysts, credit analysts, and other end-users of financial data. Examples of comprehensive annual reports and problems, some taken from Institute of Chartered Financial Analysts exams, have been added to this edition to challenge readers.

Wild's *Managerial Accounting* presents the managerial accounting course content using a corporate approach. It features the same student-friendly writing style and learning tools that have enjoyed consistent success with students and instructors using other texts in the Wild series. Also consistent with this series is *Managerial Accounting's* focus on the "Three C's":

- Clear presentation of accounting concepts,
- Concise coverage to help students focus on important material, and
- Cutting edge technology to engage students and improve their chances for success.

The author provides a balance of small and large business examples, integration of new computerized learning tools, superior end-of-chapter materials, and highly engaging pedagogical learning structures. Technology tools such as Connect Accounting provide students with further advantages as they learn and apply key accounting concepts and

methods.
