Situating Sustainability reframes our understanding of sustainability

through an emerging international terrain of concepts and case studies. These approaches include material practices, such as extraction and disaster recovery, and extend into the domains of human rights and education. This volume addresses the need in sustainability science to recognize the deep and diverse cultural histories that define environmental politics. It brings together scholars from cultural studies, anthropology, literature, law, behavioral science, urban studies, design, and development to argue that it is no longer possible to talk about sustainability in general without thinking through the contexts of research and action. These contributors are joined by artists whose public-facing work provides a mobile platform to conduct research at the edges of performance, knowledge production, and socio-ecological infrastructures. *Situating Sustainability* calls for a truly transdisciplinary research

that is guided by the humanities and social sciences in collaboration with local actors informed by histories of place. Designed for students, scholars, and interested readers, the volume introduces the conceptual practices that inform the leading edge of engaged research in sustainability.

At a time of escalating conflict between states and NGOs engaged in migrant search and rescue operations across the Mediterranean, this book explores the emerging trend of citizen-led forms of helping others at the borders of Europe. In recent years, Europe's

borders have become new sites of intervention for traditional humanitarian actors and governmental agencies, but also, increasingly, for volunteer and activist initiatives led by "ordinary" citizens. This book sets out to interrogate the shifting relationship between humanitarianism, the securitization of border and migration regimes, and citizenship. Critically examining the "do it yourself" character of refugee aid practices performed by non-professionals coming together to help in informal and spontaneous manners, the volume considers the extent to which these new humanitarian practices challenge established conceptualisations of membership, belonging, and active citizenship. Drawing on case studies from countries around Europe including Greece, Turkey, Italy, France and Russia, this collection constitutes an innovative and theoretically engaged attempt to bring the field of humanitarian

studies into dialogue with studies of grassroots refugee aid and, more explicitly, with political forms of solidarity with migrants and refugees which fall between aid and activism. This book is key reading for advanced students and researchers of humanitarian aid, European migration and refugees, and citizen-led activism.
