Voices from the Journey is a fitting offering for the Catholic Health Association's centennial anniversary. It is the people of Catholic health care, those engaged in patient and resident care, those charged with administration and governance, who so visibly embody the healing ministry of Jesus and carry the ministry into the future. Sister Casey's book celebrates the people of Catholic health care, grounding reflections in both scripture and the day-to-day challenges of this vital ministry of the Church.

Give students beginning definitions or working explanations that serve as the basis for helping them become involved in genuine theological dialogue, discussion, and discovery.

Food: can ' t live with it or without it. We are bombarded with messages that the secret to health and weight loss can be unlocked with the right product or magic discipline, but we are getting neither thinner nor happier. Reports suggest that we are losing our battle with obesity, while the anxiety people experience in relationship with food increases. We are taught that bodies are fundamentally a problem to be solved, or worse, a war to be won, while a misguided worldview suggests that our food choices are of concern to us alone; an individual act of pleasure or consequences. Few

resources speak to our food problem from a distinctly Christian perspective. Drawing on a rich assemblage of personal and collected stories grounded in the teachings of Jesus, *The Living Diet* offers a joyful alternative to the desperation and dissatisfaction that have become cultural norms for both eating and body image, inviting us to consider our choices in the context of community. Ancient wisdom yields a surprisingly modern response to the dieting dilemma, as well as to the realm of public, or popular, theology, helping the reader discover the real joy of eating and the true gift of embodied living.

This 30-day undated devotional, part of the Food for the Journey series, explores how often our idea of hope is too small when a better hope exists in Christ.

The Oxford Handbook of Mystical Theology provides a guide to the mystical element of Christianity as a theological phenomenon. It differs not only from psychological and anthropological studies of mysticism, but from other theological studies, such as more practical or pastorally-oriented works that examine the patterns of spiritual progress and offer counsel for deeper understanding and spiritual development. It also differs from more explicitly historical studies tracing the theological and philosophical contexts and ideas of various key figures and schools, as

well as from literary studies of the linguistic tropes and expressive forms in mystical texts. None of these perspectives is absent, but the method here is more deliberately theological, working from within the fundamental interests of Christian mystical writers to the articulation of those interests in distinctively theological forms, in order, finally, to permit a critical theological engagement with them for today. Divided into four parts, the first section introduces the approach to mystical theology and offers a historical overview. Part two attends to the concrete context of sources and practices of mystical theology. Part three moves to the fundamental conceptualities of mystical thought. The final section ends with the central contributions of mystical teaching to

"The history of Christian theology can be a daunting, even forbidding field for the novice, who sees neither the need for nor pertinence of rummaging around dusty old texts. This people-friendly volume, a full-scale reader in the history of Christian theology, offers an easy, non-threatening, occasionally humorous yet quite thorough entry into Christianity's central texts from the Apostolic Fathers to Mary Daly. It is also enlivened by dozens of cartoons by Rich Diesslin. Highly accessible introductions to five periods precede brief introductions to and texts from more than fifty key thinkers. The texts

The new edition, half again as large as the original, adds significant work from the Cappadocian Fathers and the Christological controversialists, the Franciscan tradition, the Radical and English reforms, and deeper coverage of twentieth-century theologians.
