An eloquent call to draw on the lessons of the past to address current threats to international order The ancient Greeks hard-wired a tragic sensibility into their culture. By looking disaster squarely in the face, by understanding just how badly things could spiral out of control, they sought to create a communal sense of responsibility and courage—to spur citizens and their

leaders to take the difficult actions necessary to avert such a fate. Today, after more than seventy years of great-power peace and a quarter-century of unrivaled global leadership, Americans have lost their sense of tragedy. They have forgotten that the descent into violence and war has been all too common throughout human history. This amnesia has become most pronounced just as Americans and the global order they created are coming under graver threat than at any time in decades. In a forceful argument that brims with historical sensibility and policy insights, two distinguished historians argue that a tragic sensibility is necessary if America and its allies are to address the dangers that menace the international order today. Tragedy may be commonplace, Brands and Edel argue, but it is not inevitable—so long as we regain an appreciation of the world's tragic nature before it is too late.

This book describes how the United States can integrate religious considerations into its foreign policy, moving towards a new leadership paradigm that effectively counters the challenge of Islamist extremism. □ A foreword by retired Marine Corps General Anthony Zinni, former Commander-in-Chief of the U.S. Central Command, U.S. Special Envoy to the Middle East, and member of the CSIS Smart Power Commission □ Maps that show areas of interest discussed in the text □ Epigraphs throughout the book to provide amplification of important insights
