The perfect crime – it's a work of art, in Frank Cottrell Boyce's ingenious story, Framed. Dylan is the only boy living in the tiny Welsh town of Manod. His parents run the Snowdonia Oasis Auto Marvel garage – and when he's not trying to persuade his sisters to play football, Dylan is in charge of the petrol log. And that means he gets to keep track of everyone coming in and out of Manod – what car they drive, what they're called, even their favourite flavour of crisps. But when a mysterious convoy of lorries trundles up the misty mountainside towards an old, disused mine, even Dylan is confounded. Who are these people – and what have they got to hide? A story inspired by a press cutting describing how, during World War II, the treasured contents of London's National Gallery were stored in Welsh slate mines. Once a month, a morale-boosting masterpiece would be unveiled in the village and then returned to London for viewing. This is a funny and touching exploration of how art – its beauty and its value – touches the life of one little boy and his big family in a very small town. This edition of Framed includes bonus material and discussion questions from Frank Cottrell Boyce, and illustrations by Steven Lenton.

In Washington, D.C., twelve-year-old Florian Bates, a consulting detective for the FBI, and his best friend Margaret help thwart the biggest art heist in United States history.

Photographs create visual narratives of experiences, places, peoples and objects that collectively and individually comprise the tourist gaze. Photography is acknowledged as having an important role in the determining of places and spaces, the construction and re-construction of identities, and the invention and re-invention of histories. So why do tourists take photos of certain things and not of others? Why do tourists take photos at all? How do photos build places, how do they change and shape lives? An interdisciplinary team of contributors from across the globe explore such questions as they examine the relationships between photography and tourism and tourists.

The highly anticipated follow-up to Framed Ink from Marcos Mateu-Mestre, Framed Ink 2 provides insight into another compositional tool that Marcos uses every day to create his amazing artwork--the energy within the working frame. In each piece of art, regardless of its format, one must consider essential factors such as the push-pull, tension-relaxation, pressure-release, balance and imbalance that happen inside the working area to support our storytelling. All of these factors apply in any aspect ratio, whether it be horizontal, vertical or square, each a format to consider when working in the movie, gaming, animation and graphic novel industries, which in our day and age can be presented through a variety of outlets such as a movie theater, home theater, social media and a number of personal devices. Marcos encourages and educates us on how not to be limited by the format but to embrace and rise to the challenge of designing for each format. A perfect accompaniment to his prior releases Framed Ink, Framed Perspective Vol. 1 and Vol. 2 and Framed Drawing Techniques, this book will take a reader's knowledge base to the next level and allow them to build on their expertise as an effective visual storyteller.

In an advanced society like the U.S., where an array of processes work against gender inequality, how does this inequality persist? Integrating research from sociology, social cognition and psychology, and organizational behavior, Framed by Gender identifies the general processes through which gender as a principle of inequality rewrites itself into new forms of social and economic organization. Cecilia Ridgeway argues that people confront uncertain circumstances with gender beliefs that are more traditional than those circumstances. They implicitly draw on the too-convenient cultural frame of gender to help organize new ways of doing things, thereby re-inscribing trailing gender stereotypes into the new activities, procedures, and forms of organization. This dynamic does not make equality unattainable, but suggests a constant struggle with uneven results. Demonstrating how personal interactions translate into larger structures of inequality, Framed by Gender is a powerful and original take on the troubling endurance of gender inequality.

Perspective is a discipline often set aside when it comes to general art study, though it is essential to master in order to produce any piece of art that is and feels realistic. As intimidating as perspective may seem, best-selling author and artist Marcos Mateu-Mestre delivers each lesson in an accessible and informative way that takes the mystery out of achieving successful scenes.

Broaching the notion of the 'frame' from a variety of analytic perspectives, and employing a range of approaches, this collection of articles engages with contemporary debates on text and image relations, literary reception and translation, narratology and cinematographic technique. The various contributions to this collection provide new readings in their respective fields, and share a common concern with exploring the productive and problematic notion of the 'frame' and of 'framing' in a wide variety of cultural media in French Studies. This interdisciplinary analysis of literary and theoretical texts, visual art and film allows for fruitful connections to be made at the level of analysis of themes and of methodology. It thus provides material that is of interest both to specialists in these fields, and also to those seeking a more general introduction to each area. This collection of articles is selected from the proceedings of the 'Framed! in French Studies' workshop, held at the Institut Français in London in February 2006.

How much can you trust your closest friend? Beth Montgomery seems to have the perfect life: a beautiful house in the hills above Los Angeles, a handsome, ambitious husband, and plans of starting a family. So it doesn't occur to her to worry when the news breaks of a quadruple homicide across town, a botched drug deal that leaves an undercover officer among the dead. Beth certainly would never think to tie the murders to the sudden reappearance in her life of wild, sexy Cassie Ogilvy, the estranged best friend she hasn't seen since they were college roommates. As Cassie confidently settles into Beth's new life, making herself comfortable not only in Beth's guestroom but with her husband as well, it becomes increasingly clear that her old friend has a lot to hide. But it isn't until a shocking late-night phone call, and Cassie's even more startling disappearance, that Beth begins to understand that her world, as she knew it, is gone forever. Unfurling over the span of three fraught, heart-pounding days, McInnis's masterful suspense debut is fast-paced and diabolically unpredictable--a fresh, surprising, and powerfully smart twist on the traditional thriller.
