A behind-the-scenes look at how the United States aided the Velvet Revolution Democracy's Defenders offers a behind-the-scenes account of the little-known role played by the U.S. embassy in Prague in the collapse of communism in what was then Czechoslovakia. Featuring fifty-two newly declassified diplomatic cables, the book shows how the staff of the embassy led by U.S. Ambassador Shirley Temple Black worked with dissident groups and negotiated with the communist government during a key period of the Velvet Revolution that freed Czechoslovakia from Soviet rule. In the vivid reporting of these cables, Black and other members of the U.S. diplomatic corps in Prague describe student demonstrations and their meetings with anti-government activists. The embassy also worked to forestall a violent crackdown by the communist regime during its final months in power. Edited by Norman L. Eisen, who served as U.S. Ambassador to the Czech Republic from 2011 to 2014, Democracy's Defenders contributes fresh evidence to the literature on U.S. diplomatic history, the cold war era, and American promotion of democracy overseas. In an introductory essay, Eisen places the diplomatic cables in context and analyzes their main themes. In an afterword, Eisen, Czech historian Dr. Mikuláš Pešta, and Brookings researcher Kelsey Landau explain how the seeds of democracy that the United States helped plant have grown in the decades since the Velvet Revolution. The authors trace a line from U.S. efforts to promote democracy and economic liberalization after the Velvet Revolution to the contemporary situations of what are now the separate nations of the Czech Republic and Slovakia.

The first detailed examination of the place of pop music film in British cinema, Stephen Glynn explores the interpenetration of music and cinema in an economic, social and aesthetic context through case studies ranging from Cliff Richard to The Rolling Stones, and from The Beatles to Plan B.

1968, I have the mind of a racist. I am a racist white woman attending an all-Black col-lege i Orangeburg State College in South Carolina. My life is at risk when deadly riots – some involving my classmates – break out on and around campus. Tragically, some of my fellow students are among the victims. It is a year packed with every emotion a human can experience, from brutal hatred to deep love, from unabashed joy to paralyzing fear. It was the worst year of my life and the best.21st Century, there is still an ongoing search for solutions to the rampant racism in America. Who among you can honestly say, "I have never had a racist thought?" Due to the present political and National atmosphere, racism has raised its ugly head, unabashed. 1968 1968 1968: The Mind of A Racist is about what it is going to take for individuals to over-come the demons that have infested hearts and souls with the deadly venom of racism.It is not a smooth transformation, but it is a possible one. Freeing oneself from those who preach hate and divisiveness is the first step into an open, accepting heart. Offered is the help that is needed to accept, allow, and respect all manner of human life. Shared in this book is the necessary tool that may allow individuals to realize their spirituality and that their nature is beyond color.So, what are the solutions? What is the cure for a sick nation, a nation on life support? The usually offered or demanded solutions in-clude more laws, better education, and better jobs. All of which are necessary. But how can you change the mind of a racist? If you do not understand how the mind of a racist thinks, how do you change a racist heart? Can you? What is the cure for hate? These are a few of the questions this work seeks to answer and present solutions for. I invite the racists among us to take the eight-week Heart-Centered challenge (chapter 17).This is an abbreviated version of my sto-ry of the events of Orangeburg SC State Col-lege in 1968. (The entire story may be read in the book, Walking On The Grass: A White Woman In A Black World by Carla R. Mancani.)

The Ford Boss Mustang is the most iconic pony car ever created, and this book covers it more extensively than any other. Boss Mustang: 50 Years—a fully expanded version of Mustang Boss 302—includes the complete history of its creation; racing and street histories of both the 302 and 429 models; and photos and interviews with Boss Mustang designers, engineers, racers, and more. Of all the legendary names in the history of the Ford Mustang, one stands apart: Boss. Originally created to homologate the new Boss 302 engine and option package for SCCA Trans-Am racing, the Mustang Boss 302 debuted for the 1969 model year and was built in limited numbers for the street through 1970. This book features never-before-seen production and racing photography, interviews with designers and engineers, and keen insight from author Donald Farr, a renowned Ford historian and Ford hall-of-fame inductee. Designed by the legendary Larry Shinoda, the Boss cars were easily distinguished from their less potent stablemates by their race-bred powerplant, standard front spoiler, and bold graphics. In 2012, Ford at long last revived this most revered of all Mustang models. With a new racing counterpart and a modern street version that delivers more than 440 horsepower, the Boss was truly back! In 2013, Ford rolled out the Boss one more time. In Boss Mustang: 50 Years, Mustang historian Donald Farr offers a complete history of the car—from its late 1960s origins in Ford's boardrooms through its Trans-Am successes and untimely demise in 1970, up to the conception and development of the spectacular, limited-edition 2012 and 2013 Boss Mustangs. Packed with brilliant photography and firsthand accounts from the people who created the original Boss, as well as the team that resurrected Ford's most iconic Mustang for the 21st century, this is the story every Mustang enthusiast has been waiting to read.

This book brings to light many aspects of the Tet offensive of 1968, an event acknowledged as the turning-point of the Vietnam War. Using previously unseen Communist Vietnamese documents combined with sources of Western origin, the author provides a more accurate version of the events, their significance, and reveals the crucial role played by US intelligence.

James Colnett, a veteran of James Cook's second voyage to North America, was an early participant in the maritime sea otter trade. Between 1786 and 1789 his two-vessel expedition traversed the Northwest Coast from Prince William Sound to Vancouver Island and wintered on the Hawaiian Islands. Along the way, he and his crew had some remarkable encounters with Native peoples of the Northwest Coast and the Hawaiian Islands: they were the first Europeans to encounter the Tsimshian and the southern Heiltsuk peoples as well as the first to land on the southern Queen Charlotte Islands. Colnett's journal of this expedition is published here for the first time. Editor Robert Galois provides extensive annotations, along with an introductory essay addressing the geopolitical context of the voyage and the intellectual background that shaped the writing of the journal. Galois supplements Colnett's writings with extracts from a second journal – also previously unpublished – by Andrew Bracey Taylor, third mate on one of the ships under Colnett's command. Also included are illustrations from Colnett's journals and a variety of maps, both contemporary and historical. This fascinating and informative account offers a new understanding of the early European presence in the Northwest and of Native responses to these developments. It will interest historians, geographers, and ethnographers of the Northwest Coast and beyond.

Democracy in Europe has been a recent phenomenon. Only in the wake of World War II were democratic frameworks secured, and, even then, it was decades before democracy truly blanketed the continent. Neither given nor granted, democracy requires conflict, often violent confrontations, and challenges to the established political order. In Europe, Geoff Eley convincingly shows, democracy did not evolve organically out of a natural consensus, the achievement of prosperity, or the negative cement of the Cold War. Rather, it was painstakingly crafted, continually expanded, and doggedly defended by varying constellations of socialist, feminist, Communist, and other radical movements that originally blossomed in the later nineteenth century. Parties of the Left championed democracy in the revolutionary crisis after World War I, salvaged it against the threat of fascism, and renewed its growth after 1945. They organized civil societies rooted in egalitarian ideals which came to form the very fiber of Europe's current democratic traditions. The trajectories of European democracy and the history of the European Left are thus inextricably bound together. Geoff Eley has given us the first truly comprehensive history of the European Left—its successes and failures; its high watermarks and its low tides; its accomplishments, insufficiencies, and excesses; and, most importantly, its formative, lasting influence on the European political landscape. At a time when the Left's influence and legitimacy are frequently called into question, Forging Democracy passionately upholds its vital contribution.
