Gas Station Pump Canopy Design Guidelines

I've been asked to help an architect design a gas station canopy for a typical 2 pump island that will be an addition to an existing station. The canopy will be about 38x15 ft in plan with 2 columns. Neither he nor I have done one before. It appears that the foundation is typically a drilled shaft similar to a large sign.

Install LED luminaires specifically designed for use in gas station canopies with an existing spacing of 14' x 14' in the center, which is within the suggested spacing-to-mounting height criteria of 1.2 to 1.0. The fixtures are also sealed and gasketed for damp or wet location rating.

"The first architect-designed gas station - a Pittsburgh Gulf station in 1913 - was also the first to offer free road maps; the familiar Shell name and logo date from 1907, when a British mother-of-pearl importer expanded its line to include the newly discovered oil of the Dutch East Indies; the first enclosed gas stations were built only after the first enclosed cars made motoring a year-round activity - and operating a service station was no longer a "seasonal" job; the system of "octane" rating was introduced by Sun Oil as a marketing gimmick (74 for premium in 1931)." "As the number of "true" gas stations continues its steady decline - from 239,000 in 1969 to fewer than 100,000 today - the words and images of this book bear witness to an economic and cultural phenomenon that was perhaps more uniquely American than any other of this century."--Jacket.

In the new millennium, will the architecture & design of today's filling stations become as talked about as those landmarks of other ages -- the great power stations, the deco cinemas from the golden age of film or the warehouses of our glorious manufacturing past?

This volume serves up a combination of broad questions, theoretical approaches, and manifold case studies to explore how people have sought to understand markets and thereby reduce risk, whether they have approached this challenge with a practical view based on their own business acumen or used the tools of scholarship.

Drive different! Instant acceleration, no noise, no grease and no pollution. The Current features the most radical vehicles and pioneers of the electric revolution. Ride, enjoy, charge, repeat!

For more information including the introduction, a full list of entries and contributors, a generous selection of sample pages and more, visit the Encyclopedic dia of 20th Century Architecture website. Focusing on architecture from all regions of the world, this three-volume set profiles the twentieth century's vast chronicle of architectural achievements, both within and well beyond the theoretical confines of modernism. Unlike existing works, this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types, movements, styles, and building practices across traditional geographic and cultural boundaries.

The purpose of this title, first published in 1972, was to bring into focus the work and viewpoints of individuals and groups that were engaged in man-environment research, design and education. Reflecting the multidisciplinary nature of the field of man-environment relations, topics range from aspects of environmental design methodology to research applications from the behavioural sciences. This title will be of interest to students of architecture.

Provides information on all the buildings of Frank Lloyd Wright that are open to the public.

Step back to the day when a visit to the gas station meant service with a smile, a wash of the windshield, and the cheerful question, "Fill 'er up?" Since their unremarkable beginnings as cheap shacks and curbside pumps at the dawn of the automobile age, gas stations have taken many forms and worn many guises: castles, cottages and teepees, Art Deco and Streamline Moderne, clad with wood, stucco, or gleaming porcelain in seemingly infinite variety. The companion volume to the Wisconsin Public Television documentary of the same name, Fill 'er Up: The Glory Days of Wisconsin Gas Stations visits 60 Wisconsin gas stations that are still standing today and chronicles the history of these humble yet ubiquitous buildings. The book tells the larger story of the gas station's place in automobile culture and its evolution in tandem with American history, as well as the stories of the individuals influenced by the gas stations in their lives. Fill 'er Up provides a glimpse into the glory days of gas stations, when full service and free oil changes were the rule and the local station was a gathering place for neighbors. More importantly, Fill 'er Up links the past and the present, showing why gas stations should be preserved and envisioning what place these historic structures can have in the 21st century and beyond.

The work of Office DA is diverse in scope and scale, ranging from the design of interiors to the broader scale of urban design and infrastructure. Their award-winning residences and public buildings can be found all over their world. The firm has been particularly active in the architectural and critical production surrounding the reconstruction of downtown Beirut. This collection of work by this young, but already renown, firm shows the depth and range of their elegant work.
