Research for Educational Change
presents ways in which

educational research can fulfil its commitments to educational practice. Focussing its discussion within the context of mathematics education, it argues that while research-generated insights can have beneficial effects on learning and teaching, the question of how these effects are to be generated and sustained is far from evident. The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice. In the first part of the book, four teams of researchers use different methodologies while analysing the same corpus of data, collected in a South African mathematics classroom. In the second part,

each of these teams makes a specific proposal about what can be done and how so that its research-generated insights have a tangible, beneficial impact on what is happening in mathematical classrooms. Combining two discourses – that of researchers speaking to one another, and that of researchers communicating their insights to those responsible for educational practice – the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education, educational research and classroom practices. This book will be key reading for postgraduates, researchers and academics in education and particularly in the areas of

mathematics education, education research, teacher education and classroom practice. It will also appeal to teacher educators, practitioners and undergraduate students interested in educational research.

Building on Bobbie Kabuto ' s groundbreaking 2010 book *Becoming Biliterate*, this book explores how identity impacts the development of bilingual readers and how reading practices are mediated by family and community contexts. Highlighting bilingual readers from Spanish, Greek, Japanese, and English language backgrounds, Kabuto offers an in-depth, interdisciplinary analysis of

these readers' behaviors and identities through the original approach of Biographic Biliteracy Profiles. The Profiles serve as a culturally relevant assessment tool for developing meaningful narratives and can reveal how bilingual readers make sense of texts in the context of their home and school environments. An ideal approach for unpacking the complexity of bilingual reading behaviors and how they change across time, the Profiles allow readers to explore what a bilingual reader's identity means to becoming biliterate; the roles of code-switching and translanguaging; the influences of readers' families and communities; and how they all interact and shape readers' identities,

behaviors, and meaning-making. Offering practical applications on observing and documenting bilingual readers, this book is an invaluable resource for scholars and students in courses on bilingualism, L2/ESL reading, and multilingualism.
