The Guidelines include detailed definitions of elements used in each dimension and sub-dimension, along with examples of application. A pre-condition when defining a subset of sectoral exposures is the systemic relevance of the risks stemming from the subset of sectoral exposures.

~~Guidelines on the appropriate subsets of exposures in the ...~~

The objective of the guidelines is to set a common framework to harmonise the design of the appropriate subsets of sectoral exposures to the application of an SyRB, facilitating a common approach throughout the EU, but also supporting reciprocation of the SyRB measures between Member States.

~~EBA/GL/2020/13 30 September 2020~~

These guidelines (hereafter referred to as the 'Guidelines') have the purpose to amend the C6/C7 guidelines (hereafter referred to as the 'Amended Guidelines'), adopted by ESMA in October 2015 in order to ensure a common, uniform and consistent application of Article 4(1)(17) read in conjunction with points (6) and (7) of Section C of Annex I of MiFID, as supplemented by Article 38 of Regulation 1287/2006/EC.

This brief provides guidance for the application of cohesive models to determine damage and fracture in materials and structural components. This can be done for configurations with or without a pre-existing crack. Although the brief addresses structural behaviour, the methods described herein may also be applied to any deformation induced material damage and failure, e.g. those occurring during manufacturing processes. The methods described are applicable to the behaviour of ductile metallic materials and structural components made thereof. Hints are also given for applying the cohesive model to other materials.
